33 CFR Part 401

Docket No. SLSDC-2014-0001

2135-AA33

Seaway Regulations and Rules: Periodic Update, Various Categories

AGENCY: Saint Lawrence Seaway Development Corporation, DOT.

ACTION: Final rule.

SUMMARY: The Saint Lawrence Seaway Development Corporation (SLSDC) and the St. Lawrence Seaway Management Corporation (SLSMC) of Canada, under international agreement, jointly publish and presently administer the St. Lawrence Seaway Regulations and Rules (Practices and Procedures in Canada) in their respective jurisdictions. Under agreement with the SLSMC, the SLSDC is amending the joint regulations by updating the Seaway Regulations and Rules in various categories. The changes update the following sections of the Regulations and Rules: Condition of Vessels; Preclearance and Security for Tolls; Tolls Assessment and Payment; Seaway Navigation; Dangerous Cargo; Toll Assessment and Payment; and, Information and Reports. These amendments are necessary to take account of updated procedures and will enhance the safety of transits through the Seaway. Many of the amendments are merely editorial or for clarification of existing requirements. The joint regulations will become effective in Canada on March 31, 2014. For consistency, because these are joint regulations under international agreement, and to avoid confusion among users of the Seaway,
the SLSDC finds that there is good cause to make the U.S. version of the amendments effective on the same date.

**DATES:** The rule will become effective on March 31, 2014.

The Notice of Proposed Rulemaking was published in the Federal Register on January
28, 2014 (79 FR 4433). No comments were received.

The SLSDC is amending several sections of the Condition of Vessels portion of the joint
Seaway regulations. In section 401.9, “Radio Telephone Equipment”, the two Corporations are
limiting the degree of error for gyro and magnetic compasses. Under section 401.10, “Mooring
lines”, the SLSDC is mandating the use of synthetic lines when using tie-up services at tie-up
walls and docks. Currently the use of synthetic lines is optional. For safety purposes in section
401.14, “Anchor marking buoys”, the SLSDC is amending the rules to require vessels to ensure
that the anchor buoy is secured by a suitable line and ready to be released prior to entering the
Seaway.

In the Preclearance and Security for Tolls section, the Seaway Corporations are amending
their joint rules in section 401.22, “Preclearance of vessels”, to require that past due invoices
must be paid prior to transiting the Seaway. In addition, provisions are being amended that would provide representatives with the ability to obtain a continuous preclearance status.

Several revisions are being made in the Seaway Navigation portion of the regulations. In section 401.29, “Maximum Draft,” the SLSDC is requiring vessels to meet a minimum draft requirement. In addition, the two Corporations are requiring vessels to be equipped with an operational anchor. Mooring lines on deck must be individually attended unless the vessel is equipped with side control pursuant to a change to section 401.46, “Attending lines.”

In the Information and Reports section, a change to section 401.79, “Advance notice of arrival, vessels requiring inspection” is being made that would require tall ships or vessels of an unusual design to undergo a Seaway yearly inspection.

The other changes to the joint regulations are merely editorial or to clarify existing requirements.

**Regulatory Evaluation**

This regulation involves a foreign affairs function of the United States and therefore Executive Order 12866 does not apply and evaluation under the Department of Transportation's Regulatory Policies and Procedures is not required.

**Regulatory Flexibility Act Determination**

I certify that this regulation will not have a significant economic impact on a substantial number of small entities. The St. Lawrence Seaway Regulations and Rules primarily relate to commercial users of the Seaway, the vast majority of whom are foreign vessel operators. Therefore, any resulting costs will be borne mostly by foreign vessels.

**Environmental Impact**
This regulation does not require an environmental impact statement under the National Environmental Policy Act (49 U.S.C. 4321, et seq.) because it is not a major federal action significantly affecting the quality of the human environment.

**Federalism**

The Corporation has analyzed this rule under the principles and criteria in Executive Order 13132, dated August 4, 1999, and has determined that this proposal does not have sufficient federalism implications to warrant a Federalism Assessment.

**Unfunded Mandates**

The Corporation has analyzed this rule under Title II of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4, 109 Stat. 48) and determined that it does not impose unfunded mandates on State, local, and tribal governments and the private sector requiring a written statement of economic and regulatory alternatives.

**Paperwork Reduction Act**

This regulation has been analyzed under the Paperwork Reduction Act of 1995 and does not contain new or modified information collection requirements subject to the Office of Management and Budget review.
