Abstract: : The affected entities are subject to the General Provisions of the NESHAP (40 CFR part 63, subpart A), and any changes, or additions to the Provisions, specified at 40 CFR part 63, subparts RRRRRR, SSSSSS, and TTTTTT. Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative.

Form Numbers: None.

Respondents/affected entities: Owners or operators of clay ceramics manufacturing, glass manufacturing, and secondary nonferrous metals processing area sources.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subparts RRRRRR, SSSSSS, and TTTTTT)

Estimated number of respondents: 82.

Frequency of response: Initially and occasionally

Total estimated burden: 1,763 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$182,301 (per year), which includes \$9,854 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is non-existent, so there is no significant change in the overall burden.

However, there is an adjustment increase in the respondent burden cost due to an update in labor rates. There is also an adjustment decrease in the total O&M costs due to a correction. The previous ICR included annualized capital costs of initial performance tests and equipment as O&M costs. This ICR corrects the O&M costs to only include ongoing costs to maintain the monitors.
