## **SUPPLEMENTARY INFORMATION:**

### **I. Information About the Project/Document**

EPA's draft ROE 2014 is a comprehensive source of scientific indicators that describe the trends in the nation's environmental and human health condition. The indicators help to answer important questions for EPA about the current status and historical trends in U.S. air, water, land, human health, ecological systems, and aspects of sustainability at the national and regional levels. These indicators are based on data collected by the EPA, other federal and state agencies, and non-governmental organizations and meet high standards for data quality, objectivity, and utility. The ROE reports status and trends; it does not analyze or diagnose the reasons for, and relationships between, trends in stressors and environmental and health outcomes.

Since its earliest release in 2003, the ROE has undergone periodic updates and restructurings. The latest version features several significant changes, the most notable being that the draft ROE 2014 is fully online, allowing it to be more interactive and accessible than ever. Users can customize graphics and pan and zoom on maps. For certain indicators, users can now choose to view statistical information about the data by simply clicking display options. Additionally, new indicators fill information gaps which previously lacked reliable, long-term data. A new conceptual framework and sustainability theme have also been added.
