SUPPLEMENTARY INFORMATION:

The OCC is requesting comment on a revision to the following information collection:

Title: Company-Run Annual Stress Test Reporting Template and Documentation for Covered Institutions with Total Consolidated Assets of \$10 Billion to \$50 Billion under the Dodd-Frank Wall Street Reform and Consumer Protection Act.

OMB Control No.: 1557-0311.

Description: Section 165(i)(2) of the Dodd-Frank Wall Street Reform and Consumer Protection Act¹ (Dodd-Frank Act) requires certain financial companies, including national banks and Federal savings associations, to conduct annual stress tests² and requires the primary financial regulatory agency³ of those financial companies to issue regulations implementing the stress test requirements.⁴ A national bank or Federal savings association is a “covered institution,” and therefore subject to the stress test requirements if its total consolidated assets exceed \$10 billion. Under section 165(i)(2), a covered institution is required to submit to the Board of Governors of the Federal Reserve System (Board) and to its primary financial regulatory agency a report at such time, in

such form, and containing such information as the primary financial regulatory agency may require.⁵ On October 9, 2012, the OCC published in the Federal Register a final rule implementing the section 165(i)(2) annual stress test requirements.⁶ On October 22, 2013 the OCC published in the Federal Register a notice describing the reports and information required under section 165(i)(2) for covered institutions with average total consolidated assets between \$10 to \$50 billion.⁷

On October 11, 2013, the OCC published in the Federal Register revised risk-based and leverage capital requirements that implement the Basel III regulatory capital reforms and certain changes required by the Dodd-Frank Act (revised regulatory capital rule).⁸ The revised regulatory capital rule introduces the new common equity tier 1 capital component and a new common equity tier 1 capital ratio, changes the definition of regulatory capital items, and changes the calculation of risk-weighted assets. All banking organizations must comply with the revised regulatory capital rule beginning on January 1, 2015.

The OCC proposes to revise the reporting templates for institutions with \$10 to \$50 billion in assets to reflect the changes to the revised regulatory capital rule. Specifically, the OCC proposes to add a common equity tier 1 capital data item to the Balance Sheet and a common equity tier 1 risk-based capital ratio data item to the Summary Schedule and Balance Sheet Schedules (baseline, adverse, and severely adverse scenarios) in order to reflect the requirements of the revised regulatory capital rule. These revisions would be effective for the 2015 stress test cycle (using September 2014

data and November 2014 scenarios with submission of results in March 2015).⁹ In addition, the OCC proposes to clarify the accompanying instructions to emphasize that institutions should transition to the revised regulatory capital rule requirements in its company-run stress test projections in the quarter in which the requirements become effective. Specifically, institutions would be required to transition to the revised regulatory capital rule and begin including the common equity tier 1 capital data item and common equity tier 1 risk-based capital ratio data item in projected quarters two (1st quarter 2015) through nine (4th quarter 2016) for each scenario for the 2015 stress test cycle.

The OCC also proposes several clarifications to the reporting instructions including: indicating that the Scenario Variables Schedule would be collected as a reporting form in Reporting Central (instead of as a file submitted in Adobe Acrobat PDF format) and clarifying how the supporting qualitative information should be organized.

The OCC has worked closely with the Board and the Federal Deposit Insurance Corporation to make the agencies' respective rules implementing the annual stress testing requirements under the Dodd-Frank Act consistent and comparable by requiring similar standards for scope of application, scenarios, data collection and reporting forms. The OCC also has worked to minimize any potential duplication of effort related to the annual stress test requirements.

Type of Review: Revision to an existing collection.

Affected Public: Businesses or other for-profit.

Burden Estimates:

⁹ The OCC, the Board, and the Federal Deposit Insurance Corporation recently proposed revisions to the schedule of the annual stress test. 79 FR 37231 (July 1, 2014). If the agencies adopt these revisions, the OCC expects to adjust its reporting instructions accordingly.

Estimated Number of Respondents: 29.

Estimated Total Annual Burden: 13,601 hours.

The burden for each \$10 to \$50 billion covered institution that completes the revised results template is estimated to be 445 hours for a total of 12,905 hours. The proposed revisions are estimated to add 5 hours of additional burden per respondent, increasing the burden from 440 hours to 445 hours. This burden includes 20 hours to input these data and 425 hours for work related to modeling efforts. The estimated revised burden for each \$10 to \$50 billion covered institution that completes the annual DFAST Scenarios Variables Template is estimated to be 24 hours for a total of 696 hours.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:
