### Applicability of ASME Code Case N-770-1, as Conditioned by Federal Regulation, to Branch Connection Butt Welds

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Draft regulatory issue summary; extension of comment period.

**SUMMARY:** On October 23, 2014, the U.S. Nuclear Regulatory Commission (NRC) solicited comments on draft regulatory issue summary (RIS) 2014-XX. The public comment period was originally scheduled to close on December 8, 2014. The NRC has decided to extend the public comment period to allow more time for members of the public to develop and submit their comments.

**DATES:** The comment period in the notice published on October 23, 2014 (79 FR 63446), is extended. Comments should be filed no later than December 22, 2014. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

## **II. Discussion.**

On October 23, 2014, the NRC published for comment draft RIS 2014-XX. The purpose of draft RIS 2014-XX, “Applicability of ASME Code Case N-770-1 As Conditioned In 10 CFR [Title 10 of the *Code of Federal Regulations*] 50.55a, ‘Codes and Standards,’ To Branch Connection Butt Welds,” is to inform addressees about reactor coolant system Alloy 82/182 branch connection dissimilar metal nozzle welds that may be of a butt weld configuration and therefore require inspection under 10 CFR 50.55a(g)(6)(ii)(F). The RIS, if issued in final form, would be used by all holders of an operating license or construction permit for a pressurized water nuclear power reactor under 10 CFR Part 50, “Domestic Licensing of Production and Utilization Facilities,” except those who have permanently ceased operations and have certified that fuel has been permanently removed from the reactor vessel. The draft RIS explains that these entities should review this information for applicability to their Alloy 600 management plan to ensure all applicable butt welds are being inspected.

The public comment period was originally scheduled to close on December 8, 2014. The NRC has decided to extend the public comment period to allow more time for members of the public to submit their comments. The deadline for submitting comments is extended to December 22, 2014.

Dated at Rockville, Maryland, this 24th day of November 2014.

For the Nuclear Regulatory Commission.
