k. Description of Request: The licensee requests a temporary variance of the maximum flow diversion requirements in Cascade Creek. U.S. Forest Service Section 4(e) Condition No. 17 (found in the project license) limits diversions to the flowline of no greater than 2 cubic feet per second (cfs), when natural inflow is less than 9 cfs. However, the licensee requests that it be allowed to divert 4 cfs into the flowline from December 15, 2014 to April 15, 2015. The licensee states that the increased diversion is necessary to keep a temporary, above-ground flowline from freezing while it performs repairs to a damaged section of flowline during the winter.
