DEPARTMENT OF ENERGY

Quadrennial Technology Review Framing Document

AGENCY: Office of the Under Secretary for Science and Energy, Quadrennial Technology Review Task Force, Department of Energy.

ACTION: Notice of availability and request for public comment.

SUMMARY: The U.S. Department of Energy (DOE or Department) has initiated the second Quadrennial Technology Review (QTR). The DOE-QTR-2015 Framing Document has been developed as a principle means of facilitating stakeholder engagement in the QTR process. The framing document describes the Nation's energy landscape and challenges, important research, development, demonstration and deployment (RDD&D) opportunities across energy supply and end-uses in working towards addressing U.S. energy-linked economic, environmental, and national security challenges. The insight gained from QTR process will provide essential information for decision-makers as they develop funding decisions, approaches to public-private partnerships, and other strategic actions over the next five years.

DATES: Written comments should be submitted on or before [INSERT DATE 30 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER].

ADDRESSES: A copy of the framing document can be found at http://www.energy.gov/qtr.
Comments may be submitted electronically to: DOE-QTR2015@hq.doe.gov or by U.S.
mail to the Office of the Under Secretary of Science and Energy, S-4, QTR Meeting
Comments, U.S. Department of Energy, 1000 Independence Avenue, SW, Washington,
DC 20585-0121.

FOR FURTHER INFORMATION CONTACT:

Dr. Sam Baldwin, S-4, U.S. Department of Energy, Office of the Under Secretary for
Telephone: (202) 586-0927. Email: DOE-QTR2015@hq.doe.gov.

SUPPLEMENTARY INFORMATION: The nation faces serious energy-linked
economic, environmental, and security challenges. Addressing these challenges
requires an aggressive plan for our science and energy enterprise while ensuring that
America maintains its leadership in a broad range of science and technology activities.
These activities include basic and applied research in the physical sciences, developing
the next generation of computational technology and developing and maintaining world
class scientific user facilities. The output of the QTR process will be coordinated with
the Quadrennial Energy Review (QER). These planning products will build and extend
existing strategic, program and budget planning activities within the Science and Energy
offices and are expected to inform ongoing budget discussions.

The QTR 2015, focusing on DOE energy technology RDD&D activities, builds upon the
first QTR in 2011, and complements the work of the QER, which focuses on
government-wide energy policy. The 2011 QTR was developed in response to the
Report to the President on “Accelerating the Pace of Change in Energy Technologies
through an Integrated Federal Energy Policy” by the President’s Council of Advisors on Science and Technology. The first QTR defined a framework for understanding and discussing energy system challenges, established a set of priorities for the Department, and explained to stakeholders the roles of DOE and the national laboratories, the broader government, the private sector, academia, and innovation in energy transformation.

QTR 2015 will describe the nation’s energy landscape and the dramatic changes that have taken place in the last four years. Specifically, it will begin by building on the first QTR and identifying what has changed in the technologies reviewed within it since 2011. It will then identify the RDD&D activities, opportunities, and pathways forward to help address our national energy challenges. QTR 2015 will approach the analysis from a strong systems perspective, it will explore the integration of science and energy technology RDD&D, it will examine cross-cutting technology RDD&D, and it will conduct an integrated analysis of RDD&D opportunities.

The Department of Energy has the largest role in the Federal Government in conducting energy RDD&D. Many other executive departments and agencies also play important roles in developing and implementing energy RDD&D. In addition, non-Federal actors are crucial contributors to energy RDD&D.

*Submitting comments via email.* Any contact information provided in your e-mail submission will not be publicly viewable except for your first and last names, organization name (if any), and submitter representative name (if any). Your contact information will be publicly viewable if you include it in the comment itself or in any
documents attached to your comment. Any information that you do not want to be publicly viewable should not be included in your comment, nor in any document attached to your comment. Otherwise, persons viewing comments will see only first and last names, organization names, correspondence containing comments, and any documents submitted with the comments.

If you do not want your personal contact information to be publicly viewable, do not include it in your comment or any accompanying documents. Instead, provide your contact information in a cover letter. Include your first and last names, email address, telephone number, and optional mailing address. The cover letter will not be publicly viewable as long as it does not include any comments.

Include contact information each time you submit comments, data, documents, and other information to DOE. If you submit via mail or hand delivery/courier, please provide all items on a CD, if feasible, in which case it is not necessary to submit printed copies. No telefacsimiles (faxes) will be accepted.

Comments, data, and other information submitted to DOE electronically should be provided in PDF (preferred), Microsoft Word or Excel, WordPerfect, or text (ASCII) file format. Provide documents that are not secured, written in English, and are free of any defects or viruses. Documents should not contain special characters or any form of encryption and, if possible, they should carry the electronic signature of the author.

Confidential Business Information. Pursuant to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email, postal mail, or hand delivery/courier two well-
marked copies: One copy of the document marked “confidential” including all the information believed to be confidential, and one copy of the document marked “non-confidential” with the information believed to be confidential deleted. Submit these documents via email or on a CD, if feasible. DOE will make its own determination about the confidential status of the information and treat it according to its determination. Confidential information should be submitted to the Confidential QTR email address: 

DOE-QTR2015-Confidential@hq.doe.gov.

Factors of interest to DOE when evaluating requests to treat submitted information as confidential include: (1) A description of the items; (2) whether and why such items are customarily treated as confidential within the industry; (3) whether the information is generally known by or available from other sources; (4) whether the information has previously been made available to others without obligation concerning its confidentiality; (5) an explanation of the competitive injury to the submitting person which would result from public disclosure; (6) when such information might lose its confidential character due to the passage of time; and (7) why disclosure of the information would be contrary to the public interest. It is DOE’s policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

Issued in Washington, DC on January 13, 2015.

Michael L. Knotek, 
Deputy Under Secretary for Science and Energy, 
Office of the Under Secretary for Science and Energy.
