In order to ensure that the CMAS operates efficiently and effectively, the Commission will require participating CMS providers to receive required monthly test messages initiated by the Federal Alert Gateway Administrator, to test their infrastructure and internal CMAS delivery systems by distributing the monthly message to their CMAS coverage area, and to log the results of the tests. The Commission will also require periodic testing of the interface between the Federal Alert Gateway and each CMS Provider Gateway to ensure the availability and viability of both gateway functions. The CMS Provider Gateways must send an acknowledgement to the Federal Alert Gateway upon receipt of these interface test messages.

The Commission, the Federal Alert Gateway and participating CMS providers will use this information to ensure the continued functioning of the CMAS, thus complying with the WARN Act and the Commission's obligation to promote the safety of life and property through the use of wire and radio communication.
