SUPPLEMENTARY INFORMATION: On October 10, 2014, FEMA published in the Federal Register at 79 FR 64610 a 60 day Federal Register notice requesting comment on FEMA's proposed revision to the National Fire Incident Reporting System (NFIRS) v5.0 information collection. FEMA subsequently received 8 comments providing positive and constructive feedback regarding the information collected by NFIRS. The cost and hour burden of the NFIRS to users was not addressed directly in any of the comments received. All comments received regarding the content of information collected, the suggested combination of the NFIRS with other data collection systems, the suggested enhancements to the user interface experience of some specific systems (which would impact average time burden in reporting), the suggested "mandatory reporting" by all fire agencies (including Wildland), and the capability for fire departments to review other fire department and regional fire incident data were provided to the program office for their consideration when updating or modifying the NFIRS.

#### Collection of Information

Title: National Fire Incident Reporting System (NFIRS) v5.0.

Type of information collection: Revision of a currently approved information collection.

Form Titles and Numbers: FEMA Form The National Fire Incident Reporting System (NFIRS) v5.0

Abstract: NFIRS was established in 1975 by the USFA as a cooperative effort of local, State, and Federal authorities to improve uniformity in fire incident reporting and to ensure that data are useable for fire protection planning and management. The program provides a well-established mechanism, using standardized reporting methods, to collect and analyze fire incident data at the Federal, State, and local levels with a myriad of life and property saving uses and benefits.

Affected Public: State, Local or Tribal, and Federal Governments.

Estimated Number of Respondents: 23,856. The number of respondents has increased by 856 since FEMA published the 60 day Federal Register notice on October 30, 2014 because of a clerical error.

Estimated Total Annual Burden Hours: 13,500,230. The annual burden hours decreased by 204,670 hours from the previous inventory due to discontinuation of use of NFIRS paper forms and a small decrease in the number of students receiving the NFIRS Program Management Training and Orientation.

Estimated Cost: The estimated annual operations and maintenance costs to respondents or record keepers resulting from the collection of information is \$13,915,000. The estimated annual cost to the Federal Government is \$2,416,255.

Dated: February 5, 2015.
