a terrorist threat or attack, and to ensure that public safety, public health, and other emergency and defense personnel have effective communications services available to them in the immediate aftermath of any terrorist attack within the United States. The Commission submitted, and OMB approved, a collection through which key communications providers could voluntarily provide contact information.

The Commission's Public Safety and Homeland Security Bureau (PSHSB) developed the Disaster Information Reporting System (DIRS) that uses electronic forms to collect Emergency Contact Information forms and through which participants may inform the Commission of damage to communications infrastructure and facilities due to major emergencies and may request resources for restoration. The Commission updated the process by increasing the number of reporting entities to ensure inclusion of wireless, wireline, broadcast, cable, VoIP, and broadband Internet access communications providers. The Commission is requesting a renewal of the currently approved collection. It is imperative that the Disaster Information Reporting System be in place so that the Commission has an accurate picture of the communications landscape during disasters.

Legal authority for this collection of information is contained in 47 U.S.C. 154(i), 218, 303(r) and 47 CFR Section 0.181(h).
