### **Federal Railroad Administration**

#### **Docket Number FRA-2006-24812**

#### **Petition for Waiver of Compliance and Notice of Public Hearing**

In accordance with part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated February 6, 2015, BNSF Railway (BNSF), has petitioned the Federal Railroad Administration (FRA) for an extension of and modification to its waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 232, Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment. Specifically, BNSF requests to extend the mileage limits specified for certain designated extended haul trains (*see* 49 CFR 232.213, *Extended haul trains*). FRA assigned the petition Docket Number FRA-2006-24812.

In its petition, BNSF states that it has a history of successfully running trains under the existing waiver in Docket Number FRA-2006-24812, and under the conditions of the temporary waiver granted in Docket Number FRA-2014-0070. BNSF states that it safely conducted thousands of loadings and millions of ton-miles with a defect ratio nearly identical to that of traditional operations since the first waiver was implemented in 2006. Based on the important benefits to safety and network fluidity associated with the successful implementation of the temporary 1,800-mile inspection waiver (Docket Number FRA-2014-0070) and BNSF's extensive history running extended haul trains

under both waivers, BNSF would like to continue and modestly extend the current BNSF waiver in Docket Number FRA-2006-24812 to 1,702 miles, from the current mileage of 1,603. BNSF states that this modest 99-mile increase in distance to 1,702 miles would afford a substantial portion of the benefits identified at the 1,800-mile distance. The incremental increase of 99 miles would allow for 68.2 percent of the coal and grain trains currently operating under the waiver in FRA-2014-0070 to be added to BNSF's waiver in FRA-2006-24812.

BNSF believes that the current waiver petition is consistent with meeting FRA's safety focus and is appropriate for National commerce concerns. This petition would be for current grain and coal trains operating within BNSF's network currently running at less than 1,702 miles between designated extended haul inspection points. The BNSF trains included in this request operate the very same type of equipment as the existing waiver trains. BNSF states it is very confident that slightly increasing the length of the extended haul inspection points on these trains listed will have no adverse impact on safe operations.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at [www.regulations.gov](http://www.regulations.gov) and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue SE, W12-140, Washington, DC 20590.
