SUPPLEMENTARY INFORMATION:

Authority for this Rulemaking

The FAA's authority to issue rules on aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart i, Section 40103, sovereignty and use of airspace, and Subpart iii, Section 44701, general requirements. Under these sections, the FAA is charged with prescribing regulations to regulate the safe and efficient use of the navigable airspace; to govern the flight, navigation, protection, and identification of aircraft for the protection of persons and property on the ground, and for the efficient use of the navigable airspace (49 U.S.C. 40103(b)), and to promote safe flight of civil aircraft in air commerce by prescribing regulations and minimum standards for other practices, methods, and procedures necessary for safety in air commerce and national security (49 U.S.C. 44701(a)(5)). This action is within the scope of that authority.

Standard Instrument Approach Procedures (SIAPs) are routinely incorporated by reference pursuant to 5 U.S.C. 552(a) and 1 CFR part 51 into Title 14 of the Code of Federal Regulations; Part 97 (14 CFR part 97), Subpart C – TERPS Procedures, and are promulgated by rulemaking procedures. The FAA will consider all public comments before issuing a final rule removing selected SIAPs.

Background

On June 27, 2014, the FAA published a policy establishing criteria for cancelling instrument approach procedures (79 FR 36576). Cancelling certain ground-based non-directional beacon (NDB), and very high frequency (VHF), omnidirectional radio range (VOR) SIAPs is one integral part of right-sizing the quantity and type of procedures in the National Airspace System (NAS). As new technology facilitates the introduction of area navigation (RNAV) instrument approach procedures, the number of procedures available in the National Airspace System has nearly doubled over the past decade. The complexity and cost to the FAA of maintaining the existing ground based navigational infrastructure while expanding the new RNAV capability is not sustainable. Therefore, the FAA is proposing the following list of SIAPs for cancellation based on the criteria established in the Policy.

The Proposed List for Cancellation

SIAPs and associated supporting data adopted or cancelled by the FAA are documented on FAA Forms 8260-3, 8260-4, and 8260-5. These forms are incorporated by reference via Transmittal Letter.

Based on the final policy criteria, 736 procedures have been identified for cancellation at this time. The procedures considered for cancellation are listed in this section. Additionally, the list can be viewed on the AeroNav Products IFP Announcements and Reports webpage at the following link,

https://www.faa.gov/air_traffic/flight_info/aeronav/procedures/reports/.

Conclusion

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore--(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments.
