Information Collection Request Title: Evaluation of Pregnancy Prevention Approaches - First Follow-up

Abstract: The Office of Adolescent Health (OAH), U.S. Department of Health and Human Services (HHS) is requesting an extension without change of a currently approved information collection request by OMB. The purpose of the extension is to complete the ongoing follow-up data collection for the Evaluation of Adolescent Pregnancy Prevention Approaches (PPA), a multi-site random assignment evaluation of promising approaches to teen pregnancy prevention.

Need and Proposed Use of the Information: The PPA study is being conducted in seven program sites around the country. The proposed extension is necessary to complete ongoing follow-up data collection in five of the seven study sites. The resulting data will be used in a rigorous program impact analysis to assess the effectiveness of each program in reducing rates of teen pregnancy and associated sexual risk behaviors.

Likely Respondents: The 1484 youth participants who agreed to participate in the study upon sample enrollment in 5 impact study sites.

The total annual burden hours estimated for this ICR are summarized in the table below.
