**SUPPLEMENTARY INFORMATION:** BOEM and BSEE published a notice of proposed rulemaking on Requirements for Exploratory Drilling on the Arctic Outer Continental Shelf (OCS) on February 24, 2015 (80 FR 9916). This proposed rule is intended to provide regulations to ensure Arctic OCS exploratory drilling operations are conducted in a safe and responsible manner that takes into account the unique conditions of Arctic OCS drilling and Alaska Natives' cultural traditions and need to access subsistence resources. The Arctic region is known for its oil and gas resource potential, its vibrant ecosystems, and the Alaska Native communities, who rely on the Arctic's resources for subsistence and cultural traditions. The region is also characterized by extreme environmental conditions, geographic remoteness, and a relative lack of fixed infrastructure and existing operations.

The proposed rule would add to, and revise existing regulations in, 30 CFR parts 250, 254, and 550 for Arctic OCS oil and gas activities. The proposed rule would focus on Arctic OCS exploratory drilling activities that use mobile offshore drilling units, and related operations during the Arctic OCS open-water drilling season.

After publication of the proposed rule, BOEM and BSEE received public comments asking BOEM and BSEE to extend the comment period on the proposed rule by 60 days. BOEM and BSEE are extending the original 60-day comment period by an additional 30 days to provide additional time for review of and comment on the Notice of Proposed Rulemaking. Accordingly, written comments must be submitted by the extended due date of May 27, 2015. BOEM and BSEE may not fully consider comments received after this date.

Dated: April 14, 2015.

Assistant Secretary  
Land and Minerals Management.
