k. Description of Request: The licensee requests a temporary variance of the minimum flow requirements at streamflow gage YB-292, located in Mormon Ravine above Newcastle Powerhouse. Specifically, the licensee requests that the instantaneous 5 cubic feet per second (cfs) minimum flow requirement be reduced to 3 cfs from May 11 to October 15, 2015. During this time the licensee would also maintain a target flow of 5 cfs, based on a 24-hour average flow at gage YB-292. The licensee states that the variance is necessary due to reduced water deliveries in the upstream canal system during the ongoing drought and the large fluctuations caused by irregular water withdrawals in the canal system made by other users.
