Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting

electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another Federal Register notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: Clean Air Act section 182 and EPA's regulations (40 CFR part 51, subpart S) establish the requirements for state and local I/M programs that are included in state implementation plans (SIPs). To provide general oversight and support to these programs, the U.S. Environmental Protection Agency requires that state agencies with basic and enhanced I/M programs collect two varieties of reports for submission to EPA:

- An annual report providing general program operating data and summary statistics, addressing the program's current design and coverage, a summary of testing data, enforcement program efforts, quality assurance and quality control efforts, and other miscellaneous information allowing for an assessment of the program's relative effectiveness; and
- A biennial report on any changes to the program over the two-year period and the impact of such changes, including any weaknesses discovered and corrections made or planned.

General program effectiveness is determined by the degree to which a program misses, meets, or exceeds the emission reductions committed to in the state's approved SIP, which, in turn, must meet or exceed the minimum emission reductions expected from the relevant performance standard, as promulgated under EPA's revisions to 40 CFR, part 51, subpart S, in response to requirements established in section 182 of the Clean Air Act. This information is used by EPA to determine a program's progress toward meeting requirements under 40 CFR, part 51, subpart S, and to provide background information in support of program evaluations.
