Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR Part 63, Subpart A, and any changes, or additions to the Provisions specified at 40 CFR Part 63, Subpart AAAA. Owners or operators of affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities: Owners or operators of municipal solid waste landfills.

Respondent's obligation to respond: Mandatory (40 CFR Part 63, Subpart AAAA).

Estimated number of respondents: 1,127 (total).

Frequency of response: Occasionally and semiannually.

Total estimated burden: 20,900 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,120,000 (per year), includes \$16,900 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is due to an increase in the number of new sources due to industry growth; it is not due to any program changes. In addition, we have adjusted the respondent burden calculation to assume all respondents will re-familiarize themselves with the regulatory requirements each year. There is also an increase in the total O&M cost associated with this ICR. Similar to the total estimated burden, EPA has adjusted the total O&M cost to account for industry growth that has occurred since the previous ICR.

Courtney Kerwin, Acting Director, Collection Strategies Division.
