FirstLight proposes to use the additional storage capacity annually between December 1 and March 31, beginning December 1, 2015, and continuing until the Commission issues a new license for the project. According to FirstLight, approval of changes in the water surface elevation limits would result in an increase in the maximum daily generation from 8,475 megawatt-hours (MWh) to 10,645 MWh, and provide Independent System Operator-New England with additional resources to address winter reliability needs.
