SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Asbestos in Shipyards Standard information collection requirements codified in regulations 29 CFR 1915.1001 that help to protect workers from the adverse health effects that may result from occupational exposure to asbestos. The major information collection requirements in the standard include: implementing an exposure-monitoring program that informs workers of their exposure-monitoring results; ensuring notification of on-site employers, at multi-employer worksites, when establishing regulated areas for work performed with asbestos-containing materials (ACMs) and/or presumed asbestos-containing materials (PACMs), of the requirements for such regulated areas, and the measures necessary to protect workers from overexposure; providing medical

surveillance for workers potentially exposed to ACMs and/or PACMs, including administering a worker medical questionnaire, providing information to the examining physician, and providing the physician's written opinion to the worker; and maintaining records of objective data used for exposure determinations, worker exposure monitoring and medical surveillance records, training records, the record (i.e., information, data, and analyses) used to demonstrate that PACMs do not contain asbestos, and notifications made, as well as received by building or facility owners regarding the content of ACMs and/or PACMs. Occupational Safety and Health Act of 1970 sections 2(b)(9), 6, and 8(c) authorize this information collection. See 29 U.S.C. 651(b)(9), 655, and 657(c).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0195.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on November 30, 2015. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about

this ICR, see the related notice published in the Federal Register on May 21, 2015 (80 FR 29344).

In order to help ensure appropriate consideration, comments should mention OMB Control Number 1218-0195. The OMB is particularly interested in comments that:
