*Abstract:* Owners and operators of affected facilities are required to comply with both reporting and record-keeping requirements for the general provisions (40 CFR Part 61, Subpart A), as well as for the requirements in 40 CFR Part 61, Subpart E. This includes submitting initial notification reports, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

*Form Numbers:* None.

*Respondents/affected entities:* Mercury ore processing facilities, mercury cell chlor-alkali plants, sludge incineration plants, and sludge drying plants.

*Respondent's obligation to respond:* Mandatory (40 CFR Part 61, Subpart E).

*Estimated number of respondents:* 107 (total).

*Frequency of response:* Initially, occasionally, semiannually and annually.

*Total estimated burden:* 20,600 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$2,070,000 (per year). There are no annualized capital/startup and operation & maintenance costs.

*Changes in the Estimates:* There is a small increase in the respondent burden due to an adjustment. In this ICR, we assume all existing sources will take some time each year to re-familiarize themselves with the regulatory requirements. This new assumption results in an increase in the labor hours and cost.
