Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the general provisions of 40 CFR Part 63, Subpart A, as well as for the specific requirements at 40 CFR Part 63, Subpart RRRRR. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Taconite iron ore processing plants.

Respondent's obligation to respond: Mandatory (40 CFR Part 63, Subpart RRRRR).

Estimated number of respondents: 4 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 276 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$326,000 (per year), which includes \$298,000 in either annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in the respondent labor hours and the number of responses as currently identified in the OMB Inventory of Approved Burdens. The decrease is due to a decline in the number of respondents. The previous ICR estimated eight facilities; however, recent industry information indicates that only half of these facilities are now in operation.

There is, however, an adjustment increase in the respondent O&M costs. There is not an actual increase in cost; rather, the increases occurred because this ICR accounts for contractor costs associated with Method 5 PM tests as an O&M cost, while the previous ICR accounted for this cost as a labor cost.
