The applicants (File Nos. 19436 and 19592) propose a series of activities to fulfill their Biosampling, Entanglement/Disentanglement, and Island Sentinel Program

responsibilities as established under the co-management agreements between NMFS and the Aleut Communities. The activities include ground and aerial surveys (using Unmanned Aircraft Systems); behavioral observations; monitoring; mark-resight; capture for flipper-tagging, standard measurements, and weight; collection of scat, molt, spew, and other samples from the ground; photograph; video; and photo-id of Steller sea lions, northern fur seals, and harbor seals. It also includes incidental harassment of the pinnipeds while performing these activities including remote camera installation, maintenance, and removal. In addition, the applicants would be authorized to collect, salvage, and accept (from subsistence users) samples from dead stranded and subsistence-hunted marine mammals. Unintentional mortality of northern fur seals and Steller sea lions is requested. See tables in the applications for numbers of takes by species, stock and activity. The Aleut Community of St. Paul Island, Tribal Government, Ecosystem Conservation Office activities will be performed in the Pribilof Islands, including St. Paul, St. George, Walrus, and Otter Islands, and Sea Lion Rock, Alaska. The St. George Traditional Council, Ecosystem Conservation Office activities will be performed in St. George Island, Alaska. The permits are requested for 5 years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), an initial determination has been made that the activities proposed are consistent with the Preferred Alternative in the Final Programmatic Environmental Impact Statement (PEIS) for Steller Sea Lion and Northern Fur Seal Research (NMFS 2007) and the 2014 Environmental Assessment for Issuance of Permits to take Steller Sea Lions by harassment during surveys using unmanned aerial systems, and that issuance of the permits would not have a significant adverse impact on the human environment.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.
