The applicants propose a use of a pesticide, sulfoxaflor, which is now considered to be unregistered under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) owing to the vacature of sulfoxaflor registrations by the United States District court for the Central District of California. ## **II. What Action is the Agency Taking?**

Under section 18 of the FIFRA (7 U.S.C. 136p), at the discretion of the EPA Administrator, a Federal or State agency may be exempted from any provision of FIFRA if the EPA Administrator determines that emergency conditions exist which require the exemption. The Idaho State Department of Agriculture has requested the EPA Administrator to issue a specific, exemption for the use of sulfoxaflor on alfalfa grown for seed to control lygus bugs. Information in accordance with 40 CFR part 166 was submitted as part of this request.

The Applicant proposes to make no more than two applications per year of Transform WG, 0.047 to 0.086 pounds of active ingredient per application. 12,000 total acres of alfalfa grown for seed are requested to be treated. Ground applications must be made in a minimum of 15 gallons of water per acre. The use season is May 30, 2016 through August 31, 2016. The chemical is requested to be used in the State of Idaho

within the counties of Ada, Canyon, Cassia, Franklin, Jerome, Oneida, Owyhee, Payette, and Twin Falls.

This notice does not constitute a decision by EPA on the application itself. The regulations governing FIFRA section 18 require publication of a notice of receipt of an application for a specific exemption proposing a use of a pesticide that has been subject to a judicial vacature, however, EPA considers public notice appropriate in this instance. Accordingly, the notice provides an opportunity for public comment on the application.

The Agency, will review and consider all comments received during the comment period in determining whether to issue the specific exemption requested by the Idaho State Department of Agriculture.
