Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart PPPP. Owners or operators of the affected facilities must submit initial notification reports, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities: Facilities that perform surface coating of plastic parts and products.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart PPPP).

Estimated number of respondents: 835 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 324,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$32,800,000 (per year), which includes \$267,000 in both annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in burden from the most recently approved ICR. This is not due to program changes; rather, the increase occurred because we assume the industry has grown, and will continue to grow, at a rate of one new source per year. This increase in the estimated number of sources results in increases in the respondent labor hours, total O&M costs, and number of responses.

Acting-Director,

Collection Strategies Division.
