SUPPLEMENTARY INFORMATION:

I. Abstract

The Quarterly Survey of U.S. Direct Investment Abroad—Transactions of U.S. Reporter with Foreign Affiliate (Form BE-577) obtains quarterly data on transactions and positions between U.S.-owned foreign business enterprises and their U.S. parents. The survey is a sample survey that covers all foreign affiliates above a size-exemption level. The sample data are used to derive universe estimates in non-benchmark years from similar data reported in the BE-10, Benchmark Survey of U.S. Direct Investment Abroad, which is conducted every five years. The data are essential for the preparation of the U.S. international transactions accounts, the input-output accounts, the national income and product accounts, and the international investment position of the United States. The data are needed to measure the size and economic significance of direct investment abroad, measure changes in such investment, and assess its impact on the U.S. and foreign economies.

BEA proposes to change the reporting requirements for certain private funds that file BEA's surveys of U.S. direct investment abroad: the BE-577, Quarterly Survey of U.S. Direct Investment Abroad; and the BE-11, Annual Survey of U.S. Direct Investment Abroad. The BE-10, Benchmark Survey of U.S. Direct Investment Abroad, will also be affected by this change but will be addressed in a proposed rule in 2019.

BEA, in cooperation with the Treasury Department, proposes to instruct reporters of investments in private funds that meet the definition of direct investment (that is, ownership by

one person of 10 percent or more of the voting interest of a business enterprise) but display characteristics of portfolio investment (specifically, investors do not intend to control or influence the management of an operating company) to report through the Treasury International Capital (TIC) reporting system, where other related portfolio investments are already being reported, and not to report on BEA's direct investment surveys. Direct investment in operating companies, including investment by and through private funds, will continue to be reported to BEA. This change will align the U.S. direct investment and portfolio investment data more closely with the intent of the investment. In addition, it will reduce burden for reporters, many of whom now report both to the TIC reporting system and to BEA's direct investment reporting system. Under the planned change, U.S. reporters will no longer be required to report on BEA surveys of U.S. direct investment abroad data for foreign affiliates that are private funds and do not own, directly or indirectly, 10 percent or more of the voting interest of another foreign business enterprise that is not also a private fund or holding company.

Other changes that are specific to the BE-577 survey include improvements to question wording, instructions, and formatting to elicit more complete and accurate responses. BEA also plans to add an additional question on certain gains/losses to the annual section of this form to help verify the quarterly data. BEA expects the additional burden to be negligible because this information is only collected once each year.

II. Method of Collection

Notice of specific reporting requirements, including who is to report, the information to be reported, the manner of reporting, and the time and place of filing reports, will be mailed to potential respondents each quarter. Reports are due 30 days after the close of each calendar or fiscal quarter—45 days if the report is for the final quarter of the respondent's financial reporting

year. Reports are required from each U.S. person that has a direct and/or indirect ownership interest of at least 10 percent of the voting stock in an incorporated foreign business enterprise, or an equivalent interest in an unincorporated foreign business enterprise, and that meets the additional conditions detailed in Form BE-577. Entities required to report will be contacted individually by BEA. Entities not contacted by BEA have no reporting responsibilities.

Potential respondents are those U.S. business enterprises that reported owning foreign business enterprises in the 2014 benchmark survey of U.S. direct investment abroad, along with entities that subsequently entered the direct investment universe. The data collected are sample data. Universe estimates are developed from the reported sample data.

As an alternative to filing paper forms, BEA offers an electronic filing option, the eFile system, for use in reporting on Form BE-577. For more information about eFile, go to www.bea.gov/efile.
