### **Evaluating Urban Resilience to Climate Change: A Multi-Sector Approach**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of public comment period.

**SUMMARY:** EPA is announcing a 30-day public comment period for the draft document titled “Evaluating Urban Resilience to Climate Change: A Multi-Sector Approach” (EPA/600/R-15/312). EPA intends to forward the public comments that are submitted in accordance with this document to the external peer reviewers for their consideration during the letter peer review.

When finalizing the draft document, EPA intends to consider any public comments received in response to this notice. **SUPPLEMENTARY INFORMATION:**

I. Information About the Document

Climate change impacts are diverse, long-term, and not easily predictable. Adapting to climate change requires making context specific and forward-looking decisions regarding a variety of climate change impacts and vulnerabilities when the future is highly uncertain. EPA scientists and their collaborators created an assessment tool to help cities identify climate change risks in eight different municipal sectors. The report identifies and tests indicators of traits that may enhance or inhibit communities' resilience to climate change, allowing decision-makers to focus planning efforts on those areas that are least resilient to anticipated impacts. The results yielded an approach that provides a way for cities to explore threats to and measures of resilience. It also demonstrates the utility of this systematic and flexible method in providing

useful information for future adaptation planning for different types of cities.
