Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The notice for the proposed information collection is published to obtain comments from the public and affected agencies.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address any of the following: (a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) Enhance the quality, utility, and clarity of the information to be collected; (d) Minimize the burden of the collection of information on those who are to respond,

including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and (e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639-7570 or send an email to omb@cdc.gov. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, Washington, DC 20503 or by fax to (202) 395-5806. Written comments should be received within 30 days of this notice.

Proposed Project

Health Risks from Using Private Wells for Drinking Water - New - National Center for Environmental Health (NCEH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Safe Drinking Water Act of 1974 (SDWA) ensures that most Americans are provided access to water that meets established public health standards. However, for over 38 million Americans who rely on private wells or other drinking

water not protected by the SDWA (herein referred to as private wells), that is not the case. There is no comprehensive knowledge about the locations of private wells, the populations served by these sources, potential contaminants that might be present in private well water in specific areas of the country, or the potential health risks associated with drinking water from these sources.

The purpose of this new generic clearance information collection request is to assess the health risks associated with exposure to contaminants in drinking water from private wells across varied geographic areas of the United States in partnership with the requesting agency (state, territorial, local, or tribal health department). The information obtained from these investigations will be used to describe health risks from exposure to contaminants in drinking water from private wells within a defined time period and geographic distribution. This information will be used to inform public health protection activities conducted by the requesting agencies.

The respondents are defined as adults at least 18 years old, who use private wells for drinking water, who are willing to receive and return a tap water sampling kit and urine specimen kit or to provide a blood specimen, and who are willing to answer survey questions. They will be recruited from geographic areas of interest as defined by the requesting

agency.

Based on our historical activities, we estimate that CDC will conduct up to 10 investigations per year. Each investigation will involve on average 200 respondents. The total time burden is 2,084 hours. There will be no cost to the respondents other than their time.

Estimated Annualized Burden Hours

Type of Respondents	Form Name	No. of Respondents	No. of Responses per Respondent	Avg. Burden per Response (in hrs.)
Adult at least 18 years old using a private well for tap water	Screening Form	2,500	1	6/60
	Questionnaire	2,000	1	35/60
	Urine Specimen and Tap Water Sample Collection	2,000	1	20/60
