Proposed Information Collection Activity; Comment Request

TITLE: Migrant and Seasonal Head Start Study

OMB NO.: New Collection

DESCRIPTION: The Office of Planning, Research and Evaluation (OPRE), Administration for Children and Families (ACF), U.S. Department of Health and Human Services, is proposing an information collection activity for the Migrant and Seasonal Head Start (MSHS) Study.

The MSHS Study is a nationally representative study that will describe the characteristics and experiences of the children and families who enroll in MSHS and the practices and services of the MSHS programs that serve them. The findings will provide essential up-to-date information to the Office of Head Start, other federal government agencies, local MSHS programs, and the public. The study will be the first national MSHS study to include direct child assessments, which will provide valuable information about MSHS children that programs can use to inform program, center and classroom practices.

Data collection will involve mail surveys to selected MSHS center directors and all MSHS program directors nationwide about operational characteristics, program- and center-level policies and practices, and services and resources offered to MSHS

families. The study will also conduct on-site data collection with children, parents, teachers, and classrooms in a nationally-representative sample of MSHS centers. The on-site data collection will include classroom observations, teacher surveys, child reports and child assessments to obtain information on classroom instruction and practices, children's abilities and families' well-being.

RESPONDENTS: MSHS program directors, center directors, teachers, assistant teachers, parents, and children.
