**SUPPLEMENTARY INFORMATION:**

## **I. ABSTRACT**

Under the Organic Act of 1916 (54 U.S.C.100701), the NPS is charged with conserving the scenery, natural and historic objects, and wildlife in its units. The acoustical environment or soundscape is a fundamental aspect of NPS units and critical to visitors' interaction with and interpretation of said resources. While the NPS has policies in place to monitor and manage acoustical conditions, it does not have information on how visitors value preserving natural sounds and/or reducing noise impacts. NPS plans to conduct a stated-preference survey of visitors in two park units in order to estimate individual values for maintenance or improvement of acoustical conditions within a national park setting.

The purpose of this IC is to continue survey development and pre-testing activities that were initiated in 2013. This continuation will involve a series of focus groups in two NPS units. The intent of the focus groups is to refine and test existing survey materials. Specifically, previous pre-testing efforts indicated that further refinement and testing of stated-preference questions was necessary. Best practice guidelines in the conduct of stated-preference studies require that survey content, language and instructions be clearly understood by respondents so that the results are as accurate and reliable as possible.
