Abstract: In accordance with the regulations at 40 CFR 79, Subparts A, B C, and D, Registration of Fuels and Fuel Additives, manufacturers (including importers) of motor-vehicle gasoline, motor-vehicle diesel fuel, and additives for those fuels are required to have these products registered by the EPA prior to their introduction into commerce. Registration involves providing a chemical description of the fuel or additive, and certain technical, marketing, and health-effects information. The development of health-effects data, as required by 40 CFR 79, Subpart F, is the subject of this ICR. The information collection requirements for Subparts A through D, and the supplemental notification requirements of Subpart F (indicating how the manufacturer will

satisfy the health-effects data requirements) are covered by a separate ICR (EPA ICR No. 0309.14, OMB Control No. 2060-0150). The health-effects data will be used to determine if there are any products which have evaporative or combustion emissions that may pose an unreasonable risk to public health, thus meriting further investigation and potential regulation. This information is required for specific groups of fuels and additives as defined in the regulations.

Form Numbers: None.

Respondents/affected entities: Manufacturers of motor-vehicle gasoline, motor-vehicle diesel fuel, and additives for those fuels.

Respondent's obligation to respond: Mandatory (40 CFR 79).

Estimated number of respondents: 2 (total).

Frequency of response: On occasion.

Total Estimated Burden: 17,600 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total Estimated Cost: \$2,053,800 (per year), includes \$597,000 annualized capital or operation & maintenance costs.

Changes in Estimates: There is a decrease of 1,600 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to a revision in the estimate for conducting the Tier 1 literature search.
