*Abstract:* As required by the Clean Air Act, EPA has regulations establishing emission standards and other requirements for various classes of vehicles, engines, and evaporative emissions. These regulations require that compliance be demonstrated prior to EPA granting a "Certificate of Conformity." EPA charges fees for administering this certification program. In 2004 the fees program was expanded to include non-road categories of vehicles and engines, such as several categories of marine engines, locomotives, non-road recreational vehicles, and many non-road compression-ignition and spark-ignition engines. Manufacturers and importers of covered vehicles, engines and components are required to pay the applicable certification fees prior to their certification applications being reviewed. Under section 208 of the Clean Air Act (42 USC 7542(c)) all information, other than trade secret processes or methods, must be publicly

available. Information about fee payments is treated as confidential information prior to certification.

*Form Numbers:* 3520-29.

*Respondents/affected entities:* Manufacturers or importers of motor vehicles and engines.

*Respondent's obligation to respond:* Required to obtain or retain a benefit (40 CFR Part 1027).

*Estimated number of respondents:* 597 (total).

*Frequency of response:* Annually, On occasion.

*Total estimated burden:* 927 hours (per year). Burden is defined at 5 CFR 1320.03(b)

*Total estimated cost:* \$59,683 (per year), includes \$9,965 annualized capital or operation & maintenance costs.

*Changes in the Estimates:* There is a decrease of 586 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to an increase in the number of online fee forms from manufacturers.
