SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled “Low Sexual Interest, Desire, and/or Arousal in Women: Developing Drugs for Treatment.” The purpose of this draft guidance is to assist sponsors in developing drugs for the treatment of low sexual interest, desire, and/or arousal in women. Specifically, this draft guidance addresses FDA’s current thinking regarding the overall clinical development program, with a focus on phase 3 trial designs, to support an indication for the treatment of these conditions.

On October 27, 2014, FDA convened a public patient-focused drug development meeting and heard directly from women suffering from female sexual desire and arousal disorders. The following day, FDA held a public scientific workshop with invited experts in sexual medicine to discuss scientific challenges involved in developing drugs to treat these disorders, including diagnostic criteria, endpoints, and patient-reported outcome instruments. Comments from the public and experts that were communicated during these proceedings, as well as comments submitted to FDA through the public docket, were used to inform this draft guidance.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on developing drugs for the treatment of low sexual interest, desire, and/or arousal in women. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.
