SUPPLEMENTARY INFORMATION:

Title: FERC-725I, Mandatory Reliability Standards for the Northeast Power Coordinating Council.

OMB Control No.: 1902-0258

Type of Request: Three-year approval of the FERC-725I information collection requirements, as modified.

Abstract: On June 9, 2016, the North American Electric Reliability Corporation (NERC) and the Northeast Power Coordination Council, Inc. ("NPCC") filed a petition for Commission approval, pursuant to section 215(d)(1) of the Federal Power Act ("FPA")¹ and Section 39.5² of the Federal Energy Regulatory Commission's regulations, of the retirement of NPCC Regional Reliability Standard PRC-002-NPCC-01 (Disturbance Monitoring) and the two related NPCC regional definitions, Current Zero Time and Generating Plant.

Type of Respondents: Public utilities.

*Estimate of Annual Burden*³: The Commission estimates the reduction (due to the retirement of Reliability Standard PRC-002-NPCC-01) in the annual public reporting burden for the information collection as follows:

Information Collection Requirements	Number of Respondents (1)	Annual Number of Responses per Respondent (2)	Total Number of Responses (1)*(2)=(3)	Average Burden Hours (4)	Total Annual Burden Hours (3)*(4)=(5)
--------------------------------------------	----------------------------------	------------------------------------------------------	----------------------------------------------	---------------------------------	----------------------------------------------

¹ 16 USC 824o (2012).

² 18 CFR 39.5 (2015).

³ The Commission defines burden as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, reference 5 Code of Federal Regulations 1320.3.

R13: GO ⁴ and TO to have evidence it acquired and installed dynamic disturbance recorders and a mutually agreed upon implementation schedule with the RC (record retention)	1	1	1	10 hrs.	10 hrs.
R14.5: GO and TO to have evidence of a maintenance and testing program for stand-alone disturbance monitoring equipment including monthly verification of active analog quantities	169	12	2028	5 hrs.	10,140 hrs.
R14.7: GO and TO to record efforts to return failed units to service if it takes longer than 90 days ⁵	33	1	33	10 hrs.	330 hrs.
R14.7: GO and TO record retention	33	1	33	10 hrs.	330 hrs.

⁴ For purposes of these charts, generation owner is abbreviated to GO, transmission owner is abbreviated to TO, reliability coordinator is abbreviated to RC, and planning coordinator is abbreviated to PC.

⁵ We estimate that an entity will experience a unit failure greater than 90 days once every five years. Therefore, 20 percent of NPCC's 169 generator owners and transmission owners will experience a unit failure of this duration each year.

R17: RC provide certain disturbance monitoring equipment data to the Regional Entity upon request	5	1	5	5 hrs.	25 hrs.
R17: RC record retention	5	1	5	10 hrs.	50 hrs.
TOTAL REDUCTIONS			2,105		10,885 hrs.

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: October 20, 2016

Kimberly D. Bose,
Secretary.
