*Abstract:* Owners and operators of affected facilities are required to comply with reporting and recordkeeping requirements for the General Provisions (40 CFR Part 63, Subpart A), as well as for the standards at 40 CFR Part 63, Subpart VVVV. This includes submittal initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring systems is inoperative. These reports are used by EPA to determine compliance with the standards.

*Form Numbers:* None.

*Respondents/affected entities:* Boat manufacturing facilities.

*Respondent's obligation to respond:* Mandatory (40 CFR Part 63, Subpart VVVV).

*Estimated number of respondents:* 144 (total).

*Frequency of response:* Initially, occasionally and semiannually.

*Total estimated burden:* 23,500 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$2,430,000 (per year), includes \$800 in annualized capital/startup and/or operation & maintenance costs.

*Changes in the Estimates:* There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. However, there is an adjustment increase in the respondent burden costs due to an increase in labor rates. This ICR uses updated labor rates from the Bureau of Labor Statistics to calculate burden costs. This ICR also rounds all calculated total values to 3 significant figures.
