SUPPLEMENTARY INFORMATION: The Port of Los Angeles has requested a temporary change to the operation of the Henry Ford Avenue railroad bridge, mile 4.8, over Cerritos Channel, at Long Beach, CA. The drawbridge navigation span provides a vertical clearance of 6 feet above Mean High Water in the closed-to-navigation position. The draw operates as required by 33 CFR 117.147(b). Navigation on the waterway is commercial, search and rescue, law enforcement, and recreational.

The drawspan will be secured in the closed-to-navigation position from 6 a.m. on April 24, 2017 to 6:30 p.m. on May 27, 2017, to allow the bridge owner to replace the operating machinery. This temporary deviation has been coordinated with the waterway users. No objections to the proposed temporary deviation were raised.

Vessels able to pass through the bridge in the closed position may do so at anytime. The bridge will be able to open for emergencies with between 4 to 24 hours advance notice. Los Angeles Harbor can be used as an alternate route for vessels. The Coast Guard will also inform the users of the waterway through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so

vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.
