**SUPPLEMENTARY INFORMATION:** The GEM Committees will discuss items on the Pacific Council's September 2017 meeting agenda with the discussions focused on, but not limited to, Electronic Monitoring (EM) - Preliminary Pacific Halibut Discard Mortality Rates and Third-Party Review. The GEM Committees may also address one or more of the Council's scheduled Administrative Matters. The Committees will discuss analytical results of halibut discard mortality rates as observed under the Pacific Council's electronic monitoring program for the limited entry groundfish non-whiting midwater trawl and bottom trawl fisheries when fishing under the non-trawl shorebased individual fishing quota program. In addition, the Committees will discuss policy implications of the Council's preferred alternative for the industry to use solely the Pacific States Marine Fisheries Commission as the EM review provider when the program is implemented in regulation.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the GEMPAC's and GEMTAC's intent to take final action to address the emergency.
