

8011-01  
SECURITIES AND EXCHANGE COMMISSION  
[Release No. 34-81493; File No. SR-NASDAQ-2017-085]

August 29, 2017

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Amend Rule 4752(d)(2)(F)(i)

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that on August 18, 2017, The NASDAQ Stock Market LLC (“Nasdaq” or “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 4752(d)(2)(F)(i) to permit the Exchange to calculate a derived price for use in the Opening Cross Price Test A when a security is the subject of a corporate action.

The text of the proposed rule change is available on the Exchange’s Website at <http://nasdaq.cchwallstreet.com>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the

---

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend Rule 4752(d)(2)(F)(i) to permit the Exchange to calculate a derived price for use in the Opening Cross Price Test A when a security is the subject of a corporate action. The Opening Price Tests are designed to avoid mispriced Opening Crosses, and the use of the clearly erroneous post-trade nullification process, by ensuring that the price established by the Opening Cross is reasonably related to the market and not the product of erroneous order entry. The Exchange believes that the proposed rule change will promote a more efficient Opening Cross by allowing the Exchange to base its Opening Price Tests on prices that are indicative of the value of the security after a corporate action.

Background

Nasdaq's Opening Cross provides an industry-leading, transparent auction process that determines a single price for the opening. Rule 4752(d)(2)(F) describes the Exchange's price protection for the Opening Cross. Once a security has an Opening Cross price set based on the process described in Rule 4752(d)(2)(A) – (E), the Exchange requires the security to pass at least one of three "tests" in order for the Opening Cross to occur. These tests are designed to make sure that the price computed pursuant to Rule 4752(d)(2)(A) – (E) is reasonably related to the market for the security.

Rule 4752(d)(2)(F)(i), i.e., Opening Price Test A, establishes a price test based on the closing price for the security. In particular, Rule 4752(d)(2)(F)(i) establishes a price range for the

Opening Cross that is established by adding and subtracting the Opening Cross Price Test A threshold from the Nasdaq Official Closing Price (for Nasdaq listed securities) or the consolidated closing price (for non-Nasdaq listed securities) of the security for the previous trading day. In addition, Rule 4752(d)(2)(F)(i) provides that the Opening Cross price range is established by adding and subtracting the Opening Cross Price Test A threshold from the offering price for new Exchange Traded Products that do not have a Nasdaq Official Closing Price. If the Nasdaq Opening Cross price is higher or lower than the Opening Cross price range established by Rule 4752(d)(2)(F)(i) or the security does not have a Nasdaq Official Closing Price or consolidated closing price for the previous trading day, Opening Cross Price Test B is performed.

Pursuant to Rule 4752(d)(2)(F)(ii), the Opening Cross price range for Test B is established by adding and subtracting the Opening Cross Price Test B threshold from the Nasdaq last sale (either round or odd lot) after 9:15 a.m. ET but prior to the Opening Cross. If the Nasdaq Opening Cross price is higher or lower than the Opening Cross price range established by this subparagraph or if there is no Nasdaq last sale, Opening Cross Price Test C is performed.

Pursuant to Rule 4752(d)(2)(F)(iii), the Opening Cross price range for Test C is established by adding to and subtracting the Opening Cross Price Test C threshold from the Nasdaq best bid (for Opening Cross prices that would be higher than the closing price used for Opening Price Test A) or Nasdaq best offer (for Opening Cross prices that would be lower than the closing price used for Opening Price Test A). For purposes of this test, if a security does not have a Nasdaq Official Closing Price or consolidated closing price, as applicable, for the previous trading day Nasdaq will use a price of \$0. If the Nasdaq Opening Cross price is higher or lower than the Opening Cross price range established by Opening Price Test C all Orders in the

Opening Cross will be cancelled back to Participants, no Opening Cross will occur, and the security will open for regular market hours trading pursuant to Rule 4752(c).<sup>3</sup>

#### Derived Price for Corporate Actions

The Exchange now proposes to amend Rule 4752(d)(2)(F)(i) to permit the Exchange to calculate a derived price for use in the Opening Cross Price Test A when a security is the subject of a corporate action where the Exchange can calculate a derived price based on the terms of the corporate action.<sup>4</sup> The Exchange is able to mathematically calculate a derived price in the case of standard corporate actions, and does so today. The Exchange can also calculate a derived price for certain non-standard corporate actions as described in more detail later in this proposed rule change.<sup>5</sup> Initially, the Exchange intends to calculate a derived price for non-standard corporate

---

<sup>3</sup> Rule 4752(c) provides that system securities in which no Nasdaq Opening Cross occurs shall begin trading at 9:30 a.m. by integrating Market Hours orders into the book in time priority and executing in accordance with market hours rules.

<sup>4</sup> As a conforming change, the Exchange also proposes to add references to the “derived price” where applicable in Rule 4752(d)(F)(i) and (iii). Furthermore, as a rule correction, the Exchange proposes to add references to the “offering price” in these rules, as the offering price is used in Opening Price Test A for new Exchange Traded Products that do not have a Nasdaq Official Closing Price. The Exchange believes that these changes are necessary so that these rules appropriately reference the prices used in Opening Price Test A. With the changes, the last sentence of Rule 4752(d)(F)(i) will state that “[i]f the Nasdaq Opening Cross price is higher or lower than the Opening Cross price range established by this subparagraph or the security does not have a Nasdaq Official Closing Price or consolidated closing price for the previous trading day, offering price, or derived price, as applicable, Opening Cross Price Test B will be performed.” In addition, the second sentence of Rule 4752(d)(F)(iii) will state that “[f]or purposes of this test, if a security does not have a Nasdaq Official Closing Price or consolidated closing price for the previous trading day, offering price, or derived price, as applicable, Nasdaq will use a price of \$0.” Furthermore, the Exchange proposes to remove the word “closing” when discussing these prices in the parentheses in the first sentence of Rule 4752(d)(F)(iii), so that it is clear that this refers to the price used in Opening Price Test A, regardless of whether that price is a closing price, offering price, or derived price.

<sup>5</sup> There may also be other non-standard corporate actions, such as in the case of a spinoff, where the Exchange is not capable of calculating a derived price.

actions only in cases that involve the issuance of a new class of securities with similar terms.<sup>6</sup> In the event the Exchange determines that it is capable of calculating a derived price for other non-standard corporate actions it will issue an Equity Trader Alert to inform members of the types of corporate actions where it will use derived prices in the Opening Price Tests pursuant to this proposed rule. The Exchange believes that using derived prices in the Opening Price Tests where possible will provide a more appropriate price test where closing and/or last sale prices are not available or reflective of the value of the security, and will therefore improve the experience for members and other market participants that trade in the Opening Cross.

Currently, for standard corporate actions (e.g., a stock split or reverse stock split) the Exchange adjusts the price of the security before applying the Opening Cross Price Tests contained in Rule 4752(d)(2)(F). Thus, for example if a Nasdaq listed security that closed at a Nasdaq Official Closing Price of \$50 per share is subject to a 2 for 1 stock split, the Exchange would adjust the closing price to \$25 per share prior to applying the Opening Cross Price Test A. This process ensures that the prices used for the Opening Price Test A accurately reflect the value of the security after the corporate action. The Exchange proposes to codify this practice in Rule 4752(d)(2)(F)(i) so that members and market participants are appropriately advised of how the Opening Price Tests are applied to securities that are subject to a standard corporate action.

In addition, securities traded on Nasdaq are infrequently subject to non-standard corporate actions that involve, for instance, a second class of shares with slightly different terms, such as a class of shares with different voting rights. An example of such a corporate action was the Google transaction in 2014 where owners of Google Class A stock received one share of Class C non-voting stock for every share of Class A stock held. Currently, the Exchange does not

---

<sup>6</sup> If the Exchange is not capable of calculating a derived price, the Exchange will perform each of the Opening Price Tests A, B, and C without a derived price.

perform a similar adjustment for non-standard corporate actions. The Exchange believes, however, that it is appropriate to calculate a derived price in these situations too.

Importantly, in cases of non-standard corporate actions, if the Exchange does not have the flexibility to adjust the stock price such securities may fail the Exchange's Opening Cross Price Tests on the day following the corporate action. In particular, today, if a security is subject to a non-standard corporate action where a new class of security is issued, it is guaranteed to fail Opening Price Test A due to the lack of appropriate closing prices on which to base that test. In addition, such securities may fail Opening Price Test B if there is no pre-market trading after 9:15 a.m. ET to establish a last sale price, and may fail Opening Price Test C if the Nasdaq best bid or offer is sufficiently wide that the opening price calculated by the auction is outside the Opening Cross price range for Test C. Since there is no guarantee that there will be pre-market trading to establish a last sale price, or that there will be a sufficiently narrow best bid or offer, a security may fail the Opening Price Tests even when a proper price is determined by the Nasdaq Opening Cross. The Exchange does not believe that it is in the interest of a fair and orderly market to cancel an opening auction where the Nasdaq Opening Cross price is reflective of the market for the security as indicated by derived prices based on the terms of the corporate action.

The Google transaction described above pre-dates the Opening Price Tests, which Nasdaq adopted in 2016.<sup>7</sup> The Exchange believes, however, that if those tests were in place at the time of that transaction they could have interfered with the Exchange's ability to execute a successful opening auction. The proposed rule change is designed to prevent such a situation for future corporate actions. The Exchange believes that market participants value trading in the Opening Cross, and would therefore be better served by Nasdaq determining a derived price to

---

<sup>7</sup> See Securities Exchange Act Release No. 77235 (February 25, 2016), 81 FR 10935 (March 2, 2016) (SR-NASDAQ-2015-159) (Approval Order).

be used in the Opening Price Tests that reflects the value of the security after the corporate action. Although in some cases a security may pass Opening Price Test B or C following a non-standard corporate action, the Exchange believes that members and other market participants are better served when the tests as a whole more closely relate to the market for the security subject to the corporate action.

The Exchange therefore proposes to amend its rules to allow it to calculate its Opening Price Test A for non-standard corporate actions by using a derived price calculated based on the terms of the corporate action, similar to the process described above for standard corporate actions today. This process will be used only for corporate actions where, similar to the Google transaction described above, the Exchange can calculate a derived price based on the terms of the corporate action. As previously discussed, the Exchange will initially use this authority only for non-standard corporate actions that involve the issuance of a new class of securities with similar terms; provided that if the Exchange determines that it is capable of calculating a derived price for other non-standard corporate actions it will issue an Equity Trader Alert to inform members of the types of corporate actions where it will use derived prices. Thus, for example, assume a Nasdaq listed security (Class A) is issuing a dividend of 2 shares of a new class of stock (Class C). If the Class A stock is trading at a price of \$120 prior to the corporate action, the Exchange could derive a price for each share of Class A and new Class C stock that is \$40 per share (i.e.,  $\$120 \div 3$ ) for purposes of the Opening Price Tests. Although there may be differences in the trading characteristics between Class A and Class C stock, the Exchange believes that using this derived price for calculation of the Opening Price Tests will provide a more reasonable basis for determining the validity of prices determined by the Opening Cross.

## 2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,<sup>8</sup> in general, and furthers the objectives of Section 6(b)(5) of the Act,<sup>9</sup> in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange believes that the proposed rule change is consistent with the protection of investors and the public interest as it will allow the Exchange to calculate a derived price for use in the Opening Cross Price Test A when a security is the subject of a non-standard corporate action. The Exchange also believes that the proposed rule change will promote just and equitable principles of trade by increasing transparency around the Exchange's current process for adjusting the prices used in Opening Cross Price Test A for securities that are subject to vanilla corporate actions. The Opening Cross provides an industry-leading, transparent price discovery process that aggregates a large pool of liquidity, across a variety of order types, in a single venue. Today, the Exchange may not be able to execute a successful Opening Cross for a security that is subject to a non-standard corporate action, as the prices used to compute the Opening Cross price ranges do not reflect the actual value of the security after the completion of the corporate action. Furthermore, in cases where a new class of securities is issued, there may be no applicable closing and/or last sale prices for the new class of securities to use to calculate the applicable Opening Cross price ranges. The proposed rule change would remedy this by allowing the Exchange to calculate an appropriate derived price to use for Opening Price Test A. The Exchange believes that this change will increase the likelihood that Nasdaq can execute a

---

<sup>8</sup> 15 U.S.C. 78f(b).

<sup>9</sup> 15 U.S.C. 78f(b)(5).

successful Opening Cross following a non-standard corporate action, and thereby promotes just and equitable principles of trade and perfects the mechanisms of a free and open market.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is designed to increase the likelihood that the Exchange can execute a successful Opening Cross in securities that are subject to a corporate action, and is not intended to have any significant impact on competition. To the contrary, the Exchange believes that the proposed rule change is evidence of the strong competition in the equities industry, where exchanges must continually improve their offerings to stay competitive.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act<sup>10</sup> and Rule 19b-4(f)(6) thereunder.<sup>11</sup>

---

<sup>10</sup> 15 U.S.C. 78s(b)(3)(A).

<sup>11</sup> 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and the text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

#### IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

##### Electronic Comments:

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an e-mail to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-NASDAQ-2017-085 on the subject line.

##### Paper Comments:

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-NASDAQ-2017-085. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications

relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street, NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NASDAQ-2017-085 and should be submitted on or before September 26, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>12</sup>

Eduardo A. Aleman,  
Assistant Secretary.
