- j. Deadline for filing motions to intervene and protests, comments, terms and conditions, and recommendations: Due to the small size and location of this project and the close

coordination with state and federal agencies during preparation of the application, the 60-day timeframe in 18 CFR 4.34(b) is shortened. Instead, motions to intervene and protests, comments, terms and conditions, and recommendations are due 30 days from the issuance date of this notice. All reply comments must be filed with the Commission within 45 days from the issuance date of this notice.

The Commission strongly encourages electronic filing. Please file motions to intervene, protests, comments, and recommendations using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, D.C. 20426. The Commission's Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application has been accepted for filing and is now ready for environmental analysis.

1. The proposed Camp McDowell Project would consist of: (1) an existing 157-foot-long, 13.5-foot-high concrete/masonry dam consisting of: (a) a 113-foot-long spillway with a crest elevation of 513.5 feet North American Vertical Datum of 1927 (NAVD 27); (b) a 9-foot-long non-overflow section with a 5-foot-diameter low level gated release pipe; and (c) a 35-foot-long non-overflow section; (2) an existing 10-acre impoundment (Clear Creek) at normal water surface elevation of 513.5 feet; (3) a 26-foot-wide, 1.3-foot-deep gated intake located on top of the spillway protected by a 6-foot-high, 30-foot-wide steel trash rack with 6-inch clear bar spacing; (4) a 27-foot-long, 6-foot-wide, concrete sluiceway; (5) a concrete powerhouse, located at the base of the dam, containing one 50-foot-long by 9-foot-diameter Archimedes screw turbine-generator unit (ASG unit), rated at 140 kW; (6) a water-level sensor, and automatic sluice gate controller; (7) a 650-foot-long, 460-volt, above-ground transmission line; and (8) appurtenant facilities. The estimated annual generation of the proposed Camp McDowell Project would be about 950 megawatt-hours. The applicant proposes to operate the project in a run-of-river mode. There are no federal or state lands associated with the project.

- m. Due to the applicant's close coordination with federal and state agencies during the preparation of the application, studies completed during pre-filing consultation, and small size and location of the project, we intend to waive scoping and expedite the exemption process. Based on a review of the application and resource agency consultation letters filed to date, Commission staff intends to prepare a single environmental assessment (EA). Commission staff determined that the issues that need to be addressed in its EA have been adequately identified during the pre-filing period, which included a public scoping meeting and site visit, and no new issues are likely to be identified through additional scoping. The EA will assess the potential effects of project construction and operation on geology and soils, aquatic, terrestrial, threatened and endangered species, recreation and land use, aesthetic, and cultural and historic resources.
- n. A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's website at <http://www.ferc.gov> using the eLibrary link. Applications for preliminary permits will not be accepted in response to this notice.
- q. A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit a development application. A notice of intent must be served on the applicant(s) named in this public notice.

In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

All filings must (1) bear in all capital letters the title PROTEST, MOTION TO INTERVENE, NOTICE OF INTENT TO FILE COMPETING APPLICATION, COMPETING APPLICATION, COMMENTS, REPLY COMMENTS, RECOMMENDATIONS, or TERMS AND CONDITIONS; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005.
