DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

[Docket No. DEA-474]

Schedules of Controlled Substances: Temporary Placement of Cyclopropyl Fentanyl into Schedule I

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Proposed amendment; notice of intent.

SUMMARY: The Administrator of the Drug Enforcement Administration is issuing this notice of intent to publish a temporary order to schedule the synthetic opioid, N-(1-phenethylpiperidin-4-yl)-N-phenylcyclopropanecarboxamide (cyclopropyl fentanyl), into Schedule I. This action is based on a finding by the Administrator that the placement of this synthetic opioid into Schedule I of the Controlled Substances Act is necessary to avoid an imminent hazard to the public safety. When it is issued, the temporary scheduling order will impose the administrative, civil, and criminal sanctions and regulatory controls applicable to Schedule I controlled substances under the Controlled Substances Act on the manufacture, distribution, reverse distribution, possession, importation, exportation, research, and conduct of instructional activities, and chemical analysis of this synthetic opioid.

DATES: [INSERT DATE OF PUBLICATION IN THE FEDERAL REGISTER].
FOR FURTHER INFORMATION CONTACT: Michael J. Lewis, Diversion Control Division, Drug Enforcement Administration; Mailing Address: 8701 Morrissette Drive, Springfield, Virginia 22152; Telephone: (202) 598–6812.

SUPPLEMENTARY INFORMATION: This notice of intent contained in this document is issued pursuant to the temporary scheduling provisions of 21 U.S.C. 811(h). The Drug Enforcement Administration (DEA) intends to issue a temporary scheduling order (in the form of a temporary amendment) to add cyclopropyl fentanyl to Schedule I under the Controlled Substances Act.¹ The temporary scheduling order will be published in the Federal Register, but will not be issued before [INSERT DATE 30 DAYS AFTER PUBLICATION IN THE FEDERAL REGISTER].

Legal Authority

Section 201 of the Controlled Substances Act (CSA), 21 U.S.C. 811, provides the Attorney General with the authority to temporarily place a substance into Schedule I of the CSA for two years without regard to the requirements of 21 U.S.C. 811(b) if he finds that such action is necessary to avoid an imminent hazard to the public safety. 21 U.S.C. 811(h)(1). In addition, if proceedings to control a substance are initiated under 21 U.S.C. 811(a)(1), the Attorney General may extend the temporary scheduling for up to one year. 21 U.S.C. 811(h)(2).

Where the necessary findings are made, a substance may be temporarily scheduled if it is not listed in any other schedule under section 202 of the CSA, 21 U.S.C. 812, or if there is no exemption or approval in effect for the substance under section 505 of the

¹ Though DEA has used the term “final order” with respect to temporary scheduling orders in the past, this notice of intent adheres to the statutory language of 21 U.S.C. 811(h), which refers to a “temporary scheduling order.” No substantive change is intended.

Background

Section 201(h)(4) of the CSA, 21 U.S.C. 811(h)(4), requires the Administrator to notify the Secretary of the Department of Health and Human Services (HHS) of his intention to temporarily place a substance into Schedule I of the CSA. The Acting Administrator transmitted notice of his intent to place cyclopropyl fentanyl in Schedule I on a temporary basis to the Assistant Secretary for Health of HHS by letter dated August 28, 2017. The Assistant Secretary responded to this notice of intent by letter dated September 6, 2017, and advised that based on a review by the Food and Drug Administration (FDA), there are currently no investigational new drug applications or approved new drug applications for cyclopropyl fentanyl. The Assistant Secretary also stated that the HHS has no objection to the temporary placement of cyclopropyl fentanyl into Schedule I of the CSA. Cyclopropyl fentanyl is not currently listed in any schedule under the CSA, and no exemptions or approvals are in effect for cyclopropyl fentanyl under section 505 of the FDCA, 21 U.S.C. 355.

To find that placing a substance temporarily into Schedule I of the CSA is necessary to avoid an imminent hazard to the public safety, the Administrator is required to consider three of the eight factors set forth in 21 U.S.C. 811(c): The substance’s history

---

2 As discussed in a memorandum of understanding entered into by the Food and Drug Administration (FDA) and the National Institute on Drug Abuse (NIDA), the FDA acts as the lead agency within the HHS in carrying out the Secretary’s scheduling responsibilities under the CSA, with the concurrence of NIDA. 50 FR 9518, Mar. 8, 1985. The Secretary of the HHS has delegated to the Assistant Secretary for Health of the HHS the authority to make domestic drug scheduling recommendations. 58 FR 35460, July 1, 1993.
and current pattern of abuse; the scope, duration and significance of abuse; and what, if any, risk there is to the public health. 21 U.S.C. 811(h)(3). Consideration of these factors includes actual abuse, diversion from legitimate channels, and clandestine importation, manufacture, or distribution. 21 U.S.C. 811(h)(3).

A substance meeting the statutory requirements for temporary scheduling may only be placed in Schedule I. 21 U.S.C. 811(h)(1). Substances in Schedule I are those that have a high potential for abuse, no currently accepted medical use in treatment in the United States, and a lack of accepted safety for use under medical supervision. 21 U.S.C. 812(b)(1).

**Cyclopropyl Fentanyl**

The recent identification of cyclopropyl fentanyl in drug evidence and the identification of this substance in association with fatal overdose events indicate that this substance is being abused for its opioid properties. No approved medical use has been identified for cyclopropyl fentanyl, nor has it been approved by the FDA for human consumption.

Available data and information for cyclopropyl fentanyl, summarized below, indicate that this synthetic opioid has a high potential for abuse, no currently accepted medical use in treatment in the United States, and a lack of accepted safety for use under medical supervision. The DEA’s three-factor analysis is available in its entirety under “Supporting and Related Material” of the public docket for this action at [www.regulations.gov](http://www.regulations.gov) under Docket Number DEA–474.

**Factor 4. History and Current Pattern of Abuse**
The recreational abuse of fentanyl-like substances continues to be a significant concern. These substances are distributed to users, often with unpredictable outcomes. Cyclopropyl fentanyl has been encountered by law enforcement and public health officials beginning as early as May 2017. The DEA is not aware of any laboratory identifications of this substance prior to 2017. Adverse health effects and outcomes of cyclopropyl fentanyl abuse are consistent with those of other opioids and are demonstrated by fatal overdose cases involving this substance.

On October 1, 2014, the DEA implemented STARLiMS (a web-based, commercial laboratory information management system) to replace the System to Retrieve Information from Drug Evidence (STRIDE) as its laboratory drug evidence data system of record. DEA laboratory data submitted after September 30, 2014, are reposited in STARLiMS. Data from STRIDE and STARLiMS were queried on August 25, 2017. STARLiMS registered a total of three reports containing cyclopropyl fentanyl from California, Connecticut, and New York. Of these three exhibits, one had a net weight of approximately one kilogram. According to STARLiMS, the first laboratory submission of cyclopropyl fentanyl occurred in Connecticut in June 2017.

The National Forensic Laboratory Information System (NFLIS) is a national drug forensic laboratory reporting system that systematically collects results from drug chemistry analyses conducted by other federal, state and local forensic laboratories across the country. NFLIS registered 10 reports containing cyclopropyl fentanyl from state or local forensic laboratories in Oklahoma in July 2017 (query date: August 29, 2017).³

³ Data are still being collected for May 2017 – August 2017 due to the normal lag period for labs reporting to NFLIS.
In addition to data recorded in NFLIS and STARLiMS, cyclopropyl fentanyl was identified in drug evidence submitted to state and local forensic laboratories in Georgia and Pennsylvania. Cyclopropyl fentanyl was confirmed in combination with U-47700, another synthetic opioid temporarily controlled in Schedule I of the CSA, in 24 glassine paper packets submitted to a law enforcement forensic laboratory in Pennsylvania.\(^4\) A law enforcement forensic laboratory in Georgia confirmed\(^5\) the presence of cyclopropyl fentanyl in counterfeit oxycodone tablets which also contained U-47700. The distribution of cyclopropyl fentanyl in these forms, and in combination with another synthetic opioid, suggests that this substance was marketed as heroin or prescription opioids in the illicit market.

Evidence suggests that the pattern of abuse of fentanyl analogues, including cyclopropyl fentanyl, parallels that of heroin and prescription opioid analgesics. Seizures of cyclopropyl fentanyl have been encountered in powder form, similar to fentanyl and heroin, and in counterfeit prescription opioid products (i.e. counterfeit oxycodone tablets). Cyclopropyl fentanyl was also confirmed in toxicology samples from fatal overdose cases.

**Factor 5. Scope, Duration and Significance of Abuse**

Reports collected by the DEA demonstrate that cyclopropyl fentanyl is being abused for its opioid properties. Abuse of cyclopropyl fentanyl has resulted in mortality (see DEA 3-Factor Analysis for full discussion). The DEA collected post-mortem toxicology and medical examiner reports on 115 confirmed fatalities associated with cyclopropyl fentanyl.

\(^4\) Email from Philadelphia Police Department-Office of Forensic Science, to DEA (August 18, 2017 11:09 a.m.) (on file with DEA).

\(^5\) Laboratory report obtained from Division of Forensic Science, Georgia Bureau of Investigation.
fentanyl which occurred in Georgia (1), Maryland (24), Mississippi (1), North Carolina (75), and Wisconsin (14). It is likely that the prevalence of this substance in opioid related emergency room admissions and deaths is underreported as standard immunoassays may not differentiate this fentanyl analogue from fentanyl.

NFLIS and STARLiMS have a total of 13 drug reports in which cyclopropyl fentanyl was identified in drug exhibits submitted to forensic laboratories in 2017 from law enforcement encounters in California, Connecticut, New York, and Oklahoma. In addition to the data collected in these databases, cyclopropyl fentanyl was identified in drug evidence submitted to forensic laboratories in Georgia (counterfeit oxycodone preparation) and Pennsylvania (24 glassine paper packets).

The population likely to abuse cyclopropyl fentanyl overlaps with the population abusing prescription opioid analgesics, heroin, fentanyl and other fentanyl-related substances. This is supported by cyclopropyl fentanyl being identified in powder contained within glassine paper packets and counterfeit prescription opioid products. This is also demonstrated by routes of drug administration and drug use history documented in cyclopropyl fentanyl fatal overdose cases. Because abusers of cyclopropyl fentanyl obtain this substance through unregulated sources, the identity, purity, and quantity are uncertain and inconsistent, thus posing significant adverse health risks to the end user. Individuals who initiate (i.e. use a drug for the first time) cyclopropyl fentanyl abuse are likely to be at risk of developing substance use disorder, overdose, and death similar to that of other opioid analgesics (e.g., fentanyl, morphine, etc.).

Factor 6. What, if Any, Risk There Is to the Public Health
With no legitimate medical use, cyclopropyl fentanyl has emerged on the illicit drug market and is being misused and abused for its opioid properties. Cyclopropyl fentanyl exhibits pharmacological profiles similar to that of fentanyl and other µ-opioid receptor agonists. The abuse of cyclopropyl fentanyl poses significant adverse health risks when compared to abuse of pharmaceutical preparations of opioid analgesics, such as morphine and oxycodone. The toxic effects of cyclopropyl fentanyl in humans are demonstrated by overdose fatalities involving this substance.

Based on information received by the DEA, the misuse and abuse of cyclopropyl fentanyl lead to, at least, the same qualitative public health risks as heroin, fentanyl, and other opioid analgesic substances. As with any non-medically approved opioid, the health and safety risks for users are high. The public health risks attendant to the abuse of heroin and opioid analgesics are well established and have resulted in large numbers of drug treatment admissions, emergency department visits, and fatal overdoses.

Cyclopropyl fentanyl has been associated with numerous fatalities. At least 115 confirmed overdose deaths involving cyclopropyl fentanyl abuse have been reported from Georgia (1), Maryland (24), Mississippi (1), North Carolina (75), and Wisconsin (14) in 2017. As the data demonstrate, the potential for fatal and non-fatal overdoses exists for cyclopropyl fentanyl and this substance poses an imminent hazard to the public safety.

**Finding of Necessity of Schedule I Placement to Avoid Imminent Hazard to Public Safety**

In accordance with 21 U.S.C. 811(h)(3), based on the available data and information, summarized above, the continued uncontrolled manufacture, distribution, importation, possession, and abuse of cyclopropyl fentanyl pose an imminent hazard to the public
safety. The DEA is not aware of any currently accepted medical uses for cyclopropyl fentanyl in the United States. A substance meeting the statutory requirements for temporary scheduling, 21 U.S.C. 811(h)(1), may only be placed in Schedule I.

Substances in Schedule I are those that have a high potential for abuse, no currently accepted medical use in treatment in the United States, and a lack of accepted safety for use under medical supervision. Available data and information for cyclopropyl fentanyl indicate that this substance has a high potential for abuse, no currently accepted medical use in treatment in the United States, and a lack of accepted safety for use under medical supervision. As required by section 201(h)(4) of the CSA, 21 U.S.C. 811(h)(4), the Administrator, through a letter dated August 28, 2017, notified the Assistant Secretary of the DEA’s intention to temporarily place this substance in Schedule I.

**Conclusion**

This notice of intent initiates a temporary scheduling process and provides the 30-day notice pursuant to section 201(h) of the CSA, 21 U.S.C. 811(h), of DEA’s intent to issue a temporary scheduling order. In accordance with the provisions of section 201(h) of the CSA, 21 U.S.C. 811(h), the Administrator considered available data and information, herein set forth the grounds for his determination that it is necessary to temporarily schedule cyclopropyl fentanyl in Schedule I of the CSA, and finds that placement of this synthetic opioid into Schedule I of the CSA is necessary in order to avoid an imminent hazard to the public safety.

The temporary placement of cyclopropyl fentanyl into Schedule I of the CSA will take effect pursuant to a temporary scheduling order, which will not be issued before [INSERT DATE 30 DAYS AFTER PUBLICATION IN THE FEDERAL REGISTER].
Because the Administrator hereby finds that it is necessary to temporarily place cyclopropyl fentanyl into Schedule I to avoid an imminent hazard to the public safety, the temporary order scheduling this substance will be effective on the date that order is published in the Federal Register, and will be in effect for a period of two years, with a possible extension of one additional year, pending completion of the regular (permanent) scheduling process. 21 U.S.C. 811(h)(1) and (2). It is the intention of the Administrator to issue a temporary scheduling order as soon as possible after the expiration of 30 days from the date of publication of this notice. Upon publication of the temporary order, cyclopropyl fentanyl will be subject to the regulatory controls and administrative, civil, and criminal sanctions applicable to the manufacture, distribution, reverse distribution, importation, exportation, research, conduct of instructional activities and chemical analysis, and possession of a Schedule I controlled substance.

The CSA sets forth specific criteria for scheduling a drug or other substance. Regular scheduling actions in accordance with 21 U.S.C. 811(a) are subject to formal rulemaking procedures done “on the record after opportunity for a hearing” conducted pursuant to the provisions of 5 U.S.C. 556 and 557. 21 U.S.C. 811. The regular scheduling process of formal rulemaking affords interested parties with appropriate process and the government with any additional relevant information needed to make a determination. Final decisions that conclude the regular scheduling process of formal rulemaking are subject to judicial review. 21 U.S.C. 877. Temporary scheduling orders are not subject to judicial review. 21 U.S.C. 811(h)(6).

Regulatory Matters
Section 201(h) of the CSA, 21 U.S.C. 811(h), provides for a temporary scheduling action where such action is necessary to avoid an imminent hazard to the public safety.

As provided in this subsection, the Attorney General may, by order, schedule a substance in Schedule I on a temporary basis. Such an order may not be issued before the expiration of 30 days from (1) the publication of a notice in the Federal Register of the intention to issue such order and the grounds upon which such order is to be issued, and (2) the date that notice of the proposed temporary scheduling order is transmitted to the Assistant Secretary of HHS. 21 U.S.C. 811(h)(1).

Inasmuch as section 201(h) of the CSA directs that temporary scheduling actions be issued by order and sets forth the procedures by which such orders are to be issued, the DEA believes that the notice and comment requirements of section 553 of the Administrative Procedure Act (APA), 5 U.S.C. 553, do not apply to this notice of intent. In the alternative, even assuming that this notice of intent might be subject to section 553 of the APA, the Administrator finds that there is good cause to forgo the notice and comment requirements of section 553, as any further delays in the process for issuance of temporary scheduling orders would be impracticable and contrary to the public interest in view of the manifest urgency to avoid an imminent hazard to the public safety.

Although the DEA believes this notice of intent to issue a temporary scheduling order is not subject to the notice and comment requirements of section 553 of the APA, the DEA notes that in accordance with 21 U.S.C. 811(h)(4), the Administrator will take into consideration any comments submitted by the Assistant Secretary in response to the notice that DEA transmitted to the Assistant Secretary pursuant to section 811(h)(4).
Further, the DEA believes that this temporary scheduling action is not a “rule” as
defined by 5 U.S.C. 601(2), and, accordingly, is not subject to the requirements of the
Regulatory Flexibility Act (RFA). The requirements for the preparation of an initial
regulatory flexibility analysis in 5 U.S.C. 603(a) are not applicable where, as here, the
DEA is not required by section 553 of the APA or any other law to publish a general
notice of proposed rulemaking.

Additionally, this action is not a significant regulatory action as defined by Executive
Order 12866 (Regulatory Planning and Review), section 3(f), and, accordingly, this
action has not been reviewed by the Office of Management and Budget.

This action will not have substantial direct effects on the States, on the relationship
between the national government and the States, or on the distribution of power and
responsibilities among the various levels of government. Therefore, in accordance with
Executive Order 13132 (Federalism) it is determined that this action does not have
sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Reporting and
recordkeeping requirements.

For the reasons set out above, the DEA proposes to amend 21 CFR part 1308 as
follows:

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

1. The authority citation for part 1308 continues to read as follows:

Authority: 21 U.S.C. 811, 812, 871(b), 956(b), unless otherwise noted.

2. In § 1308.11, add paragraph (h)(22) to read as follows:
§ 1308.11 Schedule I

* * * * * *

(h) * * *

(22) N-(1-phenethylpiperidin-4-yl)-N-phenylcyclopropanecarboxamide, its isomers, esters, ethers, salts and salts of isomers, esters and ethers (Other name: cyclopropyl fentanyl).............(9845)

* * * * * *

Dated: November 13, 2017

Robert W. Patterson
Acting Administrator
