SUPPLEMENTARY INFORMATION: The owner of the bridge, the New Jersey Department of Transportation, requested a temporary deviation in order to facilitate structural steel repairs at the lift span.

The Routes 1 & 9 Bridge across the Passaic River, mile 1.8, at Newark, New Jersey is a vertical lift bridge with a vertical clearance of 40 feet at mean high water and 45 feet at mean low water in the closed position. The existing drawbridge operating regulations are listed at 33 CFR 117.739(b).

This temporary deviation will allow the Routes 1 & 9 Bridge to remain in the closed position from 12:01 a.m. on November 20, 2017 to 11:59 p.m. on January 5, 2018. The waterway users are seasonal recreational vessels and commercial vessels of various sizes. Coordination with waterway users indicated no objection to the proposed closure of the draw. Vessels that can pass under the bridge without an opening may do so at all times. The bridge will not be able to open for emergencies. There is no alternate route for vessels to pass.

The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so vessel operators may arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.
