**SUPPLEMENTARY INFORMATION:**

**Background**

Codex was established in 1963 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers and ensure that fair practices are used in trade.

The CCFA establishes or endorses permitted maximum levels for individual food additives; prepares priority lists of food additives for risk assessment by the Joint FAO/WHO Expert Committee on Food Additives (JECFA); assigns functional classes and International Numbering System (INS) numbers to individual food additives; recommends specifications of identity and purity for food additives for adoption by Codex; considers methods of analysis for the determination of additives in food; and considers and elaborates standards or codes for related subjects, such as labeling of food additives when sold as such. The CCFA is hosted by China.
