SUPPLEMENTARY INFORMATION: In the Federal Register of September 22, 2017 (82 FR 44367), FDA gave notice that Zinpro Corp. had filed a petition to amend Title 21 of the Code of Federal Regulations in part 573 Food Additives Permitted in Feed and Drinking Water of Animals (21 CFR part 573) to provide for the safe use of chromium DL-methionine as a nutritional source of chromium in cattle feed.

Interested persons were originally given until October 23, 2017, to comment on the petitioner’s environmental assessment. The environmental assessment was not placed on public display until October 13, 2017. On our own initiative, we are reopening the comment period to allow potential respondents to thoroughly evaluate and address pertinent environmental issues. The Agency believes that a 30-day extension allows adequate time for interested persons to submit comments without significantly delaying rulemaking on this important issue.

Leslie Kux,

Associate Commissioner for Policy.
