SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled “Product Title and Initial U.S. Approval in the Highlights of Prescribing Information for Human Prescription Drug and Biological Products--Content and Format.”

On January 24, 2006, FDA published a final rule amending the requirements for the content and format of labeling for human prescription drug and biological products (71 FR 3922, January 24, 2006). This rule is known as the physician labeling rule because it addresses prescription drug labeling that is used by physicians and other health care providers. Under this rule, the prescribing information of new and more recently approved prescription drug and biological products contains the following three sections: Highlights, Full Prescribing Information: Contents, and Full Prescribing Information (§ 201.56 (d)(1) (21 CFR 201.56(d)(1))).
Highlights is required to contain the drug names (proprietary name and nonproprietary name (established name of the drug or, for biological products, the proper name)), dosage form, route of administration, and, if applicable, controlled substance symbol of the drug or biological product (§ 201.57(a)(2) (21 CFR 201.57(a)(2))). This set of information is referred to as the “product title” and follows the Highlights Limitation Statement. Highlights also must include the year of initial U.S. approval of the drug or biological product (§ 201.57(a)(3)). The initial U.S. approval must be placed immediately beneath the product title and is the four-digit year in which FDA initially approved the new molecular entity, new biological product, or new combination of active ingredients.

This draft guidance provides recommendations on the content and format of the product title in Highlights. Recommended sources for product title terminology also are provided. Appendix A, “Dosage Form Terms for Use in Human Drug Product Labeling” and Appendix B, “Route of Administration Terms for Use in Human Drug Product Labeling” contain lists of recommended dosage form and route of administration terms, respectively, for use in the product title. This draft guidance contains recommendations for products with special nomenclature considerations, recommendations for what not to include in the product title, and implications for container and carton labeling.

The draft guidance also provides recommendations on the content and format of the initial U.S. approval in Highlights. Items to consider when determining the year of initial U.S. approval are included and drug products requiring special consideration are described.
This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on the content and format of the product title and initial U.S. approval in Highlights for human prescription drug and biological products. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

II. The Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520). The collections of information in §§ 201.56 and 201.57 have been approved under OMB control number 0910-0572.
