SUPPLEMENTARY INFORMATION:

Title: Importation of Eggplant From Israel.

OMB Control Number: 0579-0350.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. As authorized by the PPA, the Animal and Plant Health Inspection Service regulates the importation of fruits and vegetables into the United States from certain parts of the world as provided in "Subpart-Fruits and Vegetables" (7 CFR 319.56-1 through 319.56-81).

Section 319.56-49 of the regulations provides the requirements for the importation of eggplant from Israel into the continental United States under specified conditions intended to prevent the introduction of certain quarantine pests. These requirements include the use of information collection activities such as trapping records, box labeling, grower registration and approval of production sites, inspection of pest-exclusionary structures, treatment approval, pest detection notification, and a phytosanitary certificate issued by the national plant protection organization (NPPO) of Israel with an additional declaration confirming that the eggplant has been produced in accordance with the regulations.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.0008 hours per response.

Respondents: Eggplant importers and growers, packinghouses, and the NPPO of Israel.

Estimated annual number of respondents: 4.

Estimated annual number of responses per respondent: 5,003.

Estimated annual number of responses: 20,011.

Estimated total annual burden on respondents: 16 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 9th day of February 2018.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.
