Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, D.C. 20426. The first page of any filing should include docket number DI18-2-000.

k. Description of Project: The proposed closed-loop Old Forge Bore Hole Reclamation Pump Storage Project would consist of: (1) a new upper reservoir with a surface area of 300 acres and a storage capacity of 4,500 acre-feet at a surface elevation of approximately 1,356 feet above mean sea level (msl) created through construction of a new roller-compacted concrete or rock-fill dam; (2) a new lower reservoir with a surface area of 300 acres and a storage capacity of 5,014 acre-feet at a surface elevation of 550 feet msl; (3) four new 5,640-foot-long, 16-foot-diameter penstocks connecting the upper and lower reservoirs; (4) a new 250-foot-long, 150-foot-wide, 50-foot-high powerhouse containing two or three turbine-generator units with a total rated capacity of 450 megawatts; (5) a new transmission line connecting the powerhouse to the 230/69-kilovolt Stanton substation owned by PPL Electric Utilities; and (6) appurtenant facilities. Merchant Hydro Developers LLC states that it will use only groundwater from an underground abandoned mine to initially charge and seasonally refill the upper reservoirs. The applicant proposes to transport groundwater to its upper reservoirs using underground pumping equipment and intakes. The applicant also states the project effectuates an interconnection line without crossing the Susquehanna River or any other body of water.

When a Declaration of Intention is filed with the Federal Energy Regulatory Commission, the Federal Power Act requires the Commission to investigate and determine if the project would affect the interests of interstate or foreign commerce. The Commission also determines whether or not the project: (1) would be located on a navigable waterway; (2) would occupy public lands or reservations of the United States; (3) would utilize surplus water or water power from a government dam; or (4) would be located on a non-navigable stream over which Congress has Commerce Clause jurisdiction and would be constructed or enlarged after 1935.
