SUPPLEMENTARY INFORMATION:

I. Background

We are announcing the availability of a draft guidance for industry entitled "The Declaration of Added Sugars on Honey, Maple Syrup and Certain Cranberry Products: Guidance for Industry." We are issuing the draft guidance consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on this topic. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternate approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

The draft guidance is intended to advise food manufacturers of our intent to exercise enforcement discretion related to the use in the Nutrition Facts label of a symbol "†" immediately after the added sugars percent Daily Value information on certain foods. The symbol would lead
the reader to truthful and non-misleading statements outside the Nutrition Facts label to provide additional information regarding the added sugars present in particular foods. The draft guidance would explain that we intend to consider exercising our enforcement discretion for the use of this symbol on single ingredient packages and/or containers of pure honey or pure maple syrup, and certain dried cranberry and cranberry juice products that are sweetened with added sugars, and that contain total sugars at levels no greater than comparable products with endogenous (inherent) sugars, but no added sugars.

II. Electronic Access

Persons with access to the internet may obtain the draft guidance at either [https://www.fda.gov/FoodGuidances](https://www.fda.gov/FoodGuidances) or [https://www.regulations.gov](https://www.regulations.gov). Use the FDA website listed in the previous sentence to find the most current version of the guidance.

III. Other Issues for Consideration

We invite interested persons to comment on topics related to the draft guidance. However, we are particularly interested in responses to the following questions:

1. The draft guidance is intended to advise food manufacturers of our intent to exercise enforcement discretion related to the use in the Nutrition Facts label of a symbol "†" immediately after the added sugars percent Daily Value information on certain foods. Should we use a different symbol? If so, what symbol should we use and what is the rationale for using an alternative? Also, should the placement or location of the symbol be elsewhere on the Nutrition Facts label? For example, should the symbol appear after "Includes X g Added Sugars" instead? Please explain where the symbol should appear and your reasons for placing the symbol elsewhere on the label.
2. We are considering giving an additional year to come into compliance with the changes required by the final rule for the labeling of packages or containers of pure honey and maple syrup, and for the dried cranberry and cranberry juice products described in this draft guidance. Consumers will likely become more acclimated and educated on having an added sugars declaration on the Nutrition Facts label during this time period, based in part on other products in the marketplace bearing the new Nutrition Facts label. Should FDA consider this period of enforcement discretion given that, in the Federal Register of October 2, 2017 (82 FR 45753), FDA has proposed to extend the Nutrition Facts label compliance date from July 26, 2018, to January 1, 2020, for manufacturers with $10 million or more in annual food sales and from July 26, 2019, to January 1, 2021, for manufacturers with less than $10 million in annual food sales? Please explain your reasoning.

Dated: February 27, 2018.

Leslie Kux,

Associate Commissioner for Policy.
