SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry entitled “Special Protocol Assessment.” SPA is a process by which sponsors may request to meet with FDA to reach agreement on the design and size of certain trials, clinical studies, or animal studies to determine if they adequately address scientific and regulatory requirements for a study that could support marketing approval. After completing the SPA review, FDA issues a letter including comments from the review team, agreement or nonagreement with the proposed protocol, and answers to the sponsor’s relevant questions. Section 119 of the Food and Drug Administration Modernization Act of 1997 (FDAMA) amended section 505(b) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(b)) and directed FDA to meet with sponsors who request to meet, provided certain conditions are met, to reach agreement on the design and size of the well-controlled clinical trials intended to form the primary basis for a

demonstration of effectiveness in a marketing application submitted under section 505(b) of the FD&C Act or section 351 of the Public Health Service Act (PHS Act) (42 U.S.C. 262). These provisions subsequently were amended in section 7002(d)(1) of the Biologics Price Competition and Innovation Act of 2009 to include any necessary clinical study or studies for biosimilar biological product applications under section 351(k) of the PHS Act. In 2013, the Pandemic and All Hazards Preparedness Reauthorization Act of 2013 further amended the SPA provisions to provide for SPA agreements regarding animal and associated clinical trials conducted in support of applications for products developed under 21 CFR part 314, subpart I, and 21 CFR part 601, subpart H (the animal rule). Such marketing applications include new drug applications (NDAs), biologics license applications (BLAs), and efficacy supplements to approved NDAs and BLAs.

In conjunction with the reauthorization of the prescription drug user fee program in FDAMA (Prescription Drug User Fee Act (PDUFA) II),¹ and with the Biosimilar User Fee Act of 2012 (BsUFA), enacted as part of the Food and Drug Administration Safety and Innovation Act, FDA agreed to specific performance goals (PDUFA goals and BsUFA goals², respectively) for SPA.

¹FDA first agreed to specific PDUFA goals for SPA in November 1997 in conjunction with PDUFA II, the reauthorization of the Prescription Drug User Fee Act of 1992. The PDUFA II goals are described in "PDUFA Reauthorization Performance Goals and Procedures," an enclosure to a letter dated November 12, 1997, from the Secretary of Health and Human Services, Donna E. Shalala, to Senator James M. Jeffords (<https://www.fda.gov/ForIndustry/UserFees/PrescriptionDrugUserFee/ucm143135.htm>). The program has been reauthorized every 5 years; the most recent goals letter is available on the FDA website at <https://www.fda.gov/ForIndustry/UserFees/PrescriptionDrugUserFee/ucm149212.htm>.

²The BsUFA goals were later updated, in conjunction with the Biosimilar User Fee Amendments of 2017.

Per section 505(b)(5)(B) of the FD&C Act, the PDUFA goals, and the BsUFA goals, the following protocols are eligible for SPA: (1) animal carcinogenicity protocols; (2) drug substance and drug product stability protocols; (3) animal efficacy protocols for studies intended to provide primary evidence of effectiveness required for approval or for licensure for products developed under the animal rule; (4) protocols for trials intended to form the primary basis of an efficacy claim; and (5) clinical studies necessary to prove biosimilarity and/or interchangeability.

This guidance finalizes the draft guidance of the same name issued May 4, 2016, and replaces the guidance of the same name issued May 17, 2002. Changes were made from the 2016 draft guidance to improve clarity and readability.

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on SPA. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.
