SUPPLEMENTARY INFORMATION:

I. ABSTRACT

This request is for extension of a currently approved information collection. Federal

regulations require the operator of a vessel with a Hawaii longline limited access permit vessel to notify NMFS if an endangered short-tailed albatross is hooked or entangled during fishing operations. Following the retrieval of the albatross from the ocean the vessel operator must record the condition of the bird on a recovery data form. A veterinarian will use the information to provide advice to the captain for caring for the bird. If the albatross is dead, the captain must attach an identification tag to the carcass to assist the U.S. Fish and Wildlife Service (USFWS) biologists in subsequent studies. This collection of information is one of the terms and conditions contained in the Endangered Species Act Section 7 biological opinion issued by USFWS, and is intended to maximize the probability of the long-term survival of short-tailed albatrosses accidentally taken by longline gear.

II. Method of Collection
