SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry entitled “Anthrax: Developing Drugs for Prophylaxis of Inhalational Anthrax.” The purpose of this guidance is to assist sponsors in the development of new drugs to be administered to people who have or may
have inhaled *Bacillus anthracis* spores, but who have not yet manifested clinical evidence of disease, to prevent the development of inhalational anthrax. This guidance clarifies that drugs for the prophylaxis of inhalational anthrax are to be considered for approval under the animal rule regulations because human efficacy trials are not ethical or feasible (21 CFR part 314, subpart I, for drugs, and 21 CFR part 601, subpart H, for biological products).

This guidance finalizes the draft guidance of the same name issued on February 16, 2016 (81 FR 7813). Changes made to the guidance took into consideration written and verbal comments received. In addition to changes primarily for clarification, the major changes are as follows: clarity in defining specific populations that would receive a drug for prophylaxis of inhalational anthrax, for example, first responders who anticipate exposure to *Bacillus anthracis* spores and initiate drug therapy immediately before exposure. In addition, the guidance was updated to provide consistency with the guidance for industry entitled “Product Development Under the Animal Rule” (available at https://www.fda.gov/ucm/groups/fdagov-public/@fdagov-drugs-gen/documents/document/ucm399217.pdf).

Issuance of this guidance fulfills a portion of the requirements of Title VIII, section 804, of the Food and Drug Administration Safety and Innovation Act (Pub. L. 112-144), which requires FDA to review and, as appropriate, revise not fewer than three guidance documents per year for the conduct of clinical trials with respect to antibacterial and antifungal drugs.

This guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on prophylaxis of inhalational anthrax. It does not establish any rights for any person and is not binding on FDA
or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

II. The Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520). The collections of information in 21 CFR parts 312 and 314 have been approved under OMB control numbers 0910-0014 and 0910-0001, respectively.
