SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing availability of a draft guidance for industry, FDA staff, and other stakeholders entitled “Patient-Focused Drug Development: Collecting Comprehensive and Representative Input.” This guidance (Guidance 1) is the first of a series of four guidance documents that FDA committed to develop to address in a stepwise manner how stakeholders (patients, researchers, medical product developers, and others) can collect and submit information from patients and caregivers for medical product development and regulatory decision making. This series of guidance documents is intended to facilitate the advancement
and use of systematic approaches to collect and use robust and meaningful patient and caregiver input that can more consistently inform medical product development and regulatory decision making. The purpose of Guidance 1 is to present methods for collecting information on the patient experience that is representative of the intended population to inform the development and evaluation of medical products throughout the medical product lifecycle. In addition, this document discusses methods on how to operationalize and standardize the collection, analysis, and dissemination of patient experience data. Guidance 1 also includes a glossary of terms that will be used in one or more of the series of four guidance documents.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on “Patient-Focused Drug Development: Collecting Comprehensive and Representative Input.” It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

II. Additional Information

Section 3002 of Title III, Subtitle A of the 21st Century Cures Act (Pub. L. 114-255) directs FDA to develop patient-focused drug development guidance to address a number of areas, including under section 3002(c)(1) (methodological approaches), which are relevant and objective and ensure that such data are accurate and representative of the intended population, that a person seeking to collect patient experience data to inform regulatory decision making may use.

In addition, FDA committed to meet certain performance goals under the sixth authorization of the Prescription Drug User Fee Act. These goal commitments were developed
in consultation with patient and consumer advocates, healthcare professionals, and other public stakeholders, as part of negotiations with regulated industry. Section I.J.1. of the commitment letter, “Enhancing the Incorporation of the Patient’s Voice in Drug Development and Decision-Making,” (https://www.fda.gov/downloads/ForIndustry/UserFees/PrescriptionDrugUserFee/UCM511438.pdf) outlines work, including the development of a series of guidance documents and associated public workshops to facilitate the advancement and use of systematic approaches to collect and utilize robust and meaningful patient and caregiver input that can more consistently inform drug development, and, as appropriate, regulatory decision making.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm or https://www.regulations.gov.
